

CALORIFIERS, THERMAL STORAGE & HEATING COMPONENTS

CATALOGUE
2017 - 2018

Cordivari company has a proven industrial tradition and is now one of the most important manufacturers in the heating and plumbing industry in Italy.

Founded in 1972 by Ercole Cordivari, the company is producing calorifiers, thermal storage and heating components, solar thermal systems, compressed air receivers, design radiators, chimney flues and food containers. Cordivari plants are situated on an area of 280.000 square meters and employ more than 450 employees.

Thanks to its development strategies, all addressed to the new technologies and to the training of new human resources, Cordivari is equipped with modern structures and advanced production processes. All the products are designed and produced in Italy and the technological, ergonomic and ecological choices allow to work respecting the human being and its environment. UNI EN ISO 14001:2015 environment managing systems and UNI EN ISO 9001 Quality system are perfectly integrated to grant and ensure company's main goals and values.

The highly qualified management, the constant research for innovative solutions and the extremely customer-oriented company policy stand for the leading market position and the exclusive know-how in the field of integrated heating systems that the Cordivari group has acquired.

All this is the result of a continuous commitment to achieving Customer Satisfaction.

Cav. Ercole Cordivari

Technologies for wellness

Development, design and innovation studies are key points in Cordivari production process. Each proposed solution conveys technical reliability, design, ergonomics, ease of use and installation. The continuous development of our product offer, wants to witness the company's attention to the market needs. Similarly, the research and development of new solutions follows the trends of an efficiency and energy savings oriented market.

The different phases of production are in perfect harmony with the best techniques for industrial automation, robotics and advanced craftsmanship. Every product undergoes several times during the production stages, a rigorous control, manual and visual.

Cordivari products meet the most important certifications, such as the PED (Pressure Equipment Directive) and the Directive 2009/125/CE (ErP – eco-friendly planning regulations) in compliance with the cylinders and other pressure vessels manufactured. All items for Domestic Hot Water storage are certified for drinkable water use in accordance with the strictest Italian and foreign regulations (SSICA, Attestation ACS, DVGW W270, UBA, WRAS).

In Cordivari quality care and attention to the environment has always been home. In fact we were the first company of the heating sector to obtain the certification according to UNI EN ISO 9001 integrated with environmental management certification UNI EN ISO 14001: 2015. This production philosophy, which is now a way of life for us, means reduction of emissions and energy inefficiencies, waste reduction and recycling over 60% and allows us to operate in a sustainable and environmentally friendly way, using clean energy from renewable sources, using only eco-friendly materials from raw materials to packaging.

GUIDE WHEN CHOOSING A CALORIFIER

A calorifier is an indirect water heating appliance (i.e. one that features at least one heat exchanger) which accumulates heat so as to handle consumption rates that may vary greatly over a period of time, while also limiting the power used by the generators.

Cordivari offers a wide and varied range of calorifiers, thermal storage and heating components, to provide the most suitable product to any need and also allow simultaneous use of more energy sources.

Calorifiers with traditional boilers:

These products are designed for use with conventional boilers which use water as a heating medium in a sealed or open expansion circuit. The heat exchangers are designed to handle high flow rates on the primary side to ensure that the heat transfer will be efficient while at the same time avoiding excessively low return water temperatures.

Calorifiers with biomass boilers:

The selection of a calorifier while operating in conjunction with a biomass boiler must take account of fact that excessively low return water temperatures could reduce the lifespan of the boiler. In addition, a calorifier with a larger accumulation volume than normal will be more suitable as it will act as a buffer which will be beneficial to the biomass boiler.

Calorifiers with condensing boilers:

Condensing boilers are highly efficient and ecologically friendly. They operate at optimum performance when the flow water temperature is limited which results in the return water temperature being as low as possible. This will ensure that the latent heat is extracted out of the combustion products which will maximise the efficiency of the system.

Calorifiers with solar systems:

The heat exchange coil surface area is a critical issue when interfacing solar thermal systems with calorifiers due to limited primary flow rates and temperatures. The calorifier must also be capable of acting as a buffer to harness the solar energy throughout daylight hours.

Calorifiers with heat pumps:

Calorifiers operating in conjunction with air-to-water or water-to-water heat pumps must have extremely oversized heat exchange surface areas to ensure that heat exchange will take place even when there is a limited difference in temperature between the primary circuit and secondary stored water. This will maximise the COP (coefficient of performance) of the heat pump.

Calorifiers with steam boilers:

The use of saturated steam as a heating medium to produce domestic hot water, although little used in the housing sector, is a solution which is still employed in industrial environments where the steam is already in use for the manufacturing process. Technically speaking, steam calorifiers are characterized by relatively small heat exchangers, as on one hand the steam gives high heat exchange coefficients and on the other hand the exchangers usually operate with considerable differences in temperature between the primary and secondary circuits. The use of steam demands a more stringent safety regime than the use of low pressure hot water systems as steam boilers, depending on their capacity and design pressures, are classified as higher risk and therefore must comply with the European Pressure Equipment Directive.

Calorifiers operating with more than one energy source

The demand to heat a calorifier using more than one energy source, while at the same time keeping the various circuits separate, has become much more common in recent times with the advent of renewable technologies which usually need to be backed-up with conventional boilers. In these cases, calorifiers with a number of heat exchangers are used with the design ensuring that excellent thermal stratification will be achieved with minimal interference between the various heat sources.

Calorifiers operating with renewable energies

D.H.W. production system connected to renewable energies, exploiting natural resources coming from air, water and ground.

Calorifiers operating with electrical power

Cordivari products designed for working with electricity can be connected to A/C power supply. Combined with a renewable energy power supply system (fotovoltaic, wind energy, and so on), it allows to have an environmental friendly system.

Domestic hot water production (D.H.W.)

GUIDE WHEN CHOOSING STORAGE TANKS

A storage tank is a well insulated tank that is inserted in heating systems powered by a biomass generator. It has the dual function of allowing the generator to operate in a regular manner, restricting the number of stoppages, and of creating a thermal stabiliser for the heating system, thus improving working comfort considerably.

Cordivari offers a wide range of storage tanks, which include both standard versions and a number of combined versions to be used as a single appliance, acting both as a storage tank and to produce domestic hot water.

Central heating systems with one or more boilers which are plumbed together and do not generate domestic hot water.

Central heating systems with one or more boilers which are plumbed together in conjunction with solar power which is connected to either one or two coil type heat exchangers. Domestic hot water is not generated in these tanks.

Heating systems with one or more sources hydraulically divided, with the exploitation of the solar power and without DHW production. These are heating systems powered by a biomass generator or more generators that are hydraulically divided. The preparation of the DHW is done without involving the hot water storage tank.

Combined central heating system and domestic hot water production with one or more boilers which are plumbed together.

Combined central heating system and domestic hot water production with one or more boilers which are plumbed together.

Combined central heating system and domestic hot water production with one or more boilers which are plumbed together.

NEW BOLLY ERP A CLASS

Bolly calorifiers with A energy efficiency class synthesize performance and efficiency being at the top of the energetic class with excellent performances in DWH production and energy saving.

These tanks for DHW preparation are expressly conceived for installations and latest generation buildings and for all those who wish to achieve the best performances both with any traditional or renewable energetic source or heat generator. This new range of BOLLY A CLASS is available with one or two fixed heat exchangers with capacity from 200 up to 500lt.

The reliability and versatility are key aspects that always have distinguished the Bolly range and are now enhanced by the lowest thermal dispersions envisioned by existing norm 2009/125/CE ErP Ecodesign, consolidating their lead role in the market.

NEW PLATE HEAT EXCHANGER

Cordivari plate heat exchangers, are offering now an even more complete range of solutions for domestic, residential and commercial applications.

A wide and flexible proposal, both for brazed exchangers of small dimensions, or plate-to-plate exchangers for a greater heat exchange.

New range of exchangers, thanks to various dimensions and types, to connections from DN32 to DN100, to different and extended working pressure limits, allows to meet any plant requirements or plumbing need.

From small single-family house sourced by boiler or pellet stove, to big plants, every installation finds today the most suitable Cordivari solutions thanks to the new on-line professional dimensioning tool where you can always find the best performing solution and the most economical as well.

NEW MACS MODULES

The new MACS® electronic modules are used for instant production of DHW with demanding flow rates.

Cordivari proposes the new cascade-system MACS® module, with batteries of modules (from 2 to 3) managed through an intelligent electronic control unit.

Thanks to the electronic management the desired DHW will be produced in a constant and instantaneous way, regardless any peak in demand of it.

The new electronic device unit is also able to control a recirculation circuit and anti-legionella cycles via thermal shock.

With the new MACS® cascade systems the comfort and high performance will be always guaranteed in case of complex applications with important demand.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

HEAT EXCHANGER

316L Stainless Steel Antilegionella® heat exchanger, with tubes bent to the bottom

INSULATION

- HARD: High thermal insulation with ecological polyurethane hard foam.
- SOFT: NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

Magnesium anode. Models > 1500 n° 2 magnesium anode.

DRAIN

External confluence through drain connection.

Models > 1000 external confluence through drain pipe.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use for max temperature up to 200°C. Mild steel exchanger head with anticorrosion treatment.

WARRANTY

5 years - See general sales conditions and warranty

EXTRA1 - HEAT EXCHANGERS TECHNICAL DATA

Cordivari heat exchangers, with tubes bent to the bottom, are able to heat the complete quantity of volume in an homogeneous way.

Energy storing is therefore improved and Ignition time data have to be referred to the complete volume of the tank, while in traditional straight heat exchangers equipped calorifires, a range between 9-17% of volume remains cold.

STANDARD HEAT EXCHANGER

100% VOLUME HEATED WITH
ANTILEGIONELLA® HEAT EXCHANGERS

EXTRA1 COMPACT

POLYWARM® COATED CALORIFIERS WITH 1 STAINLESS STEEL EXTRACTABLE HEAT EXCHANGER

APPLICATION

Production and storage of domestic hot water, suitable for low-ceilinged rooms

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

HEAT EXCHANGER

316L Stainless Steel Antilegionella® heat exchanger, with tubes bent to the bottom

INSULATION (DISMOUNTABLE)

NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501. Grey PVC external lining.

CATHODE PROTECTION

2 magnesium anodes.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use for max temperature up to 200°C. Mild steel exchanger head with anticorrosion treatment.

WARRANTY

5 years - See general sales conditions and warranty

EXTRA1 COMPACT- HEAT EXCHANGERS TECHNICAL DATA

Cordivari heat exchangers, with tubes bent to the bottom, are able to heat the complete quantity of volume in an homogeneous way. Energy storing is therefore improved and Ignition time data have to be referred to the complete volume of the tank, while in traditional straight heat exchangers equipped calorifires, a range between 9-17% of volume remains cold.

ANTILEGIONELLA® CURVED HEAT EXCHANGERS

APPLICATION

Production and storage of domestic hot water.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

HEAT EXCHANGER

2 316L stainless steel heat exchangers (upper: straight - lower: Antilegionella® with tubes bent to the bottom).

INSULATION

- HARD: High thermal insulation with ecological polyurethane hard foam.
- SOFT: NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

Magnesium anode. Models > 1500 n° 2 magnesium anode.

DRAIN

External confluence through drain connection.

Models > 1000 external confluence through drain pipe.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use for max temperature up to 200°C. Mild steel exchanger head with anticorrosion treatment.

WARRANTY

5 years - See general sales conditions and warranty

CORDIVARI Lab
TÜV Rheinland Energie und Umwelt GmbH states that test procedures and Cordivari LAB are certified conforming to European standard EN 15332, as indicated by Ecodesign ErP Directive.

Models from 1500 to 5000 have two gripps on the bottom which allow the use of forklift when handling and drain pipe already fitted.

- 1 Drain 1" 1/4 F.
For model 1000 connection 1" 1/2 F
- 2 Domestic cold water circuit inlet
- 3 Alternative domestic cold water circuit inlet or connection for more boilers
- 4 Lower heat exchanger outlet 1" F
For models > 800 connection 2" F
- 5 Heat exchanger flange Lower
- 6 Lower heat exchanger inlet 1" F
For models > 800 connection 2" F
- 7-12 Connection for instrumentation 1/2" F
- 8 Connection for magnesium anode 1" 1/4 F
- 9 Upper heat exchanger outlet 1" F
For models > 800 connection 2" F
- 10 Heat exchanger flange Upper
- 11 Upper heat exchanger inlet 1" F
For models > 800 connection 2" F
- 13 Connection for 2nd anode 1" 1/4 Gas F (only for models > 1500)
- 14 Connection for electrical immersion 1" 1/2 F
For models > 800 connection 2" Gas F
- 15-17 Connection for recirculation or for domestic hot water
- 16 Connection for instrumentation 1/2" Gas F
- 18 Domestic hot water outlet
- 19-20 Heat exchangers air purge 3/8" Gas F
- 21 Drain 1" Gas F (only for models > 1000)

EXTRA2 - HEAT EXCHANGERS TECHNICAL DATA

Cordivari heat exchangers, with tubes bent to the bottom, are able to heat the complete quantity of volume in an homogeneous way.

Energy storing is therefore improved and Ignition time data have to be referred to the complete volume of the tank, while in traditional straight heat exchangers equipped calorifiers, a range between 9-17% of volume remains cold.

UPPER STRAIGHT HEAT EXCHANGERS

EXTRA2 - HEAT EXCHANGERS TECHNICAL DATA

Data have been calculated on following basis:

- 1) Primary circuit at T1 and proper energy source;
- 2) Production of DHW in continue way from 10 °C at t2;
- 3) DHW that can be taken in the first 10' and in the first hour from storage at 60°C, input 10°C and output 45°C;
- 4) Sanitary water according to UNI CTI 8065.

DHW produced in the first 10 minutes in lt/10' input 10 °C output 45 °C, storage at t2 and primary at T1				DHW produced in the first hour in lt/60' input 10 °C output 45 °C, storage at t2 and primary at T1				Flow rate	Exchanger pressure loss

EXTRA 3

POLYWARM® COATED CALORIFIERS WITH 3 STAINLESS STEEL EXTRACTABLE HEAT EXCHANGERS

APPLICATION

Production and storage of domestic hot water.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

HEAT EXCHANGER

3 316L stainless steel heat exchangers (upper, middle: straight - lower: Antilegionella® with tubes bent to the bottom).

INSULATION

- HARD: High thermal insulation with ecological polyurethane hard foam.
- SOFT: NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

2 magnesium anodes.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use for max temperature up to 200°C. Mild steel exchanger head with anticorrosion treatment.

WARRANTY

5 years - See general sales conditions and warranty

EXTRA3 - HEAT EXCHANGERS TECHNICAL DATA

Cordivari heat exchangers, with tubes bent to the bottom, are able to heat the complete quantity of volume in an homogeneous way. Energy storing is therefore improved and Ignition time data have to be referred to the complete volume of the tank, while in traditional straight heat exchangers equipped calorifires, a range between 9-17% of volume remains cold.

UPPER STRAIGHT HEAT EXCHANGERS

Model	Ignition time (minutes) from 10 °C to t2 and primary at T1				Maximum power exchange (kW) with primary at T1, secondary within 10-45 °C and constant use of DHW production				DHW continuous production lt/h within 10-45 °C and primary at T1

EXTRA3 - HEAT EXCHANGERS TECHNICAL DATA

Data have been calculated on following basis:

- 1) Primary circuit at T1 and proper energy source;
- 2) Production of DHW in continue way from 10 °C at t2;
- 3) DHW that can be taken in the first 10' and in the first hour from storage at 60°C, input 10°C and output 45°C;
- 4) Sanitary water according to UNI CTI 8065.

DHW produced in the first 10 minutes in lt/10' input 10 °C output 45 °C, storage at t2 and primary at T1				DHW produced in the first hour in lt/60' input 10 °C output 45 °C, storage at t2 and primary at T1				Flow rate	Exchanger pressure loss

POLYWARM® COATED CALORIFIERS WITH 1 STAINLESS STEEL EXTRACTABLE HEAT EXCHANGER

APPLICATION

Production and storage of domestic hot water.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

HEAT EXCHANGER

1 heat exchanger with 316L stainless steel or copper tubes.

INSULATION (DISMOUNTABLE)

NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501. Grey PVC external lining.

CATHODE PROTECTION

Magnesium anode. Models > 1500 n° 2 magnesium anode.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use for max temperature up to 200°C. Mild steel exchanger head with anticorrosion treatment.

WARRANTY

4000	3072161430009	8	
5000	3072161430011	10	

Data have been calculated on following basis: Primary circuit at 80 °C, and proper energy source; Production of DHW in continue way from 10 °C at t2; DHW that can be taken in the first 10' and in the first hour from storage at 60°C, input 10°C and output 45°C; Sanitary water according to UNI CTI 8065. Even if tanks are tested to resist till max temperature, the local legislation has always to be observed during the use.

Model	Ignition Time	Output	Continuous production of DHW	DHW produced in the first 10 Min.	DHW produced in the first hour	Flow rate	Exchanger pressure loss

EXTRA1 VAPORE

POLYWARM® COATED CALORIFIERS WITH 1 STAINLESS STEEL EXTRACTABLE HEAT EXCHANGER
FOR STEAM GENERATOR

APPLICATION

Production and storage of sanitary hot water. Suitable for steam generators.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

HEAT EXCHANGER

1 stainless steel 316L straight heat exchanger suitable for steam power.

INSULATION

- HARD: High thermal insulation with ecological polyurethane hard foam.
- SOFT: NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

Magnesium anode. Models > 1500 n° 2 magnesium anode.

DRAIN

External confluence through drain connection.

Models > 1000 external confluence through drain pipe.

GASKET- FLANGE PLATE

Asbestos-free fiber gaskets

Mild steel exchanger head with anticorrosion treatment.

WARRANTY

5 years - See general sales conditions and warranty

EXTRA1PLUS - HEAT EXCHANGERS TECHNICAL DATA

Data have been calculated on following basis:

- 1) Primary circuit at T1 and proper energy source;
- 2) Production of DHW in continue way from 10 °C at t2;
- 3) DHW that can be taken in the first 10' and in the first hour from storage at 60°C, input 10°C and output 45°C;
- 4) Sanitary water according to UNI CTI 8065.

COPPER FINNED AND TINNED HEAT EXCHANGER

EXTRA 2 PLUS

POLYWARM® COATED CALORIFIERS WITH 2 EXTRACTABLE FINNED COPPER HEAT EXCHANGERS

APPLICATION

Production and storage of domestic hot water.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

HEAT EXCHANGER

2 copper finned and tinned heat exchangers.

INSULATION

- HARD: High thermal insulation with ecological polyurethane hard foam.
- SOFT: NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

Magnesium anode. Models > 1500 n° 2 magnesium anode.

DRAIN

External confluence through drain connection.

Models > 1000 external confluence through drain pipe.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use for max temperature up to 200°C. Mild steel inspection flange plate with Polywarm®

WARRANTY

5 years - See general sales conditions and warranty

EXTRA2 PLUS - HEAT EXCHANGERS TECHNICAL DATA

Data have been calculated on following basis:

- 1) Primary circuit at T1 and proper energy source;
- 2) Production of DHW in continue way from 10 °C at t2;
- 3) DHW that can be taken in the first 10' and in the first hour from storage at 60°C, input 10°C and output 45°C;
- 4) Sanitary water according to UNI CTI 8065.

UPPER COPPER FINNED AND TINNED HEAT EXCHANGERS

Model	Ignition time (minutes) from 10 °C to t2 and primary at T1				Maximum power exchange (kW) with primary at T1, secondary within 10-45 °C and constant use of DHW production				DHW continuous production lt/h within 10-45 °C and primary at T1

EXTRA 3 PLUS

POLYWARM® COATED CALORIFIERS WITH 3 EXTRACTABLE FINNED COPPER HEAT EXCHANGERS

APPLICATION

Production and storage of domestic hot water.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

HEAT EXCHANGER

3 copper finned and tinned heat exchangers.

INSULATION

- HARD: High thermal insulation with ecological polyurethane hard foam.
- SOFT: NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

Magnesium anode. Models > 1500 n° 2 magnesium anode.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use for max temperature up to 200°C. Mild steel inspection flange plate with Polywarm®

WARRANTY

5 years - See general sales conditions and warranty

ACCESSORIES AND SPARE PARTS

See Accessories section for the entire list.

CORDIVARI® Lab
TÜV Rheinland Energie und Umwelt GmbH states that test procedures and Cordivari LAB are certified conforming to European standard EN 15332, as indicated by Ecodesign ErP Directive.

- 1 Drain 1" Gas F
- 2 Domestic cold water circuit inlet
- 3 Alternative domestic cold water circuit inlet or connection for more boilers
- 4 Lower heat exchanger outlet
- 5 Lower heat exchanger flange Øe 300
- 6 Lower heat exchanger inlet
- 7 Connection for instrumentation 1/2" Gas F
- 8 Connection for magnesium anode 1"1/4 Gas F
- 9 Middle heat exchanger outlet
- 10 Middle Heat exchanger flange Øe 300
- 11 Middle heat exchanger inlet
- 12 Connection for instrumentation 1/2" Gas F
- 13 Connection for 2nd anode 1"1/4 Gas F (only for models > 1500)
- 14 Upper heat exchanger flange Øe 300
- 15 18 Connection for recirculation or for domestic hot water
- 16 Connection for instrumentation 1/2" Gas F
- 17 Upper heat exchanger outlet
- 20 Upper heat exchanger inlet
- 21 Domestic hot water outlet 2" Gas F

The calorifier have two grips on the bottom which allow the use of forklift when handling and drain pipe already fitted.

EXTRA3 PLUS - HEAT EXCHANGERS TECHNICAL DATA

Data have been calculated on following basis:

- 1) Primary circuit at T1 and proper energy source;
- 2) Production of DHW in continue way from 10 °C at t2;
- 3) DHW that can be taken in the first 10' and in the first hour from storage at 60°C, input 10°C and output 45°C;
- 4) Sanitary water according to UNI CTI 8065.

UPPER COPPER FINNED AND TINNED HEAT EXCHANGERS

Model	Ignition time (minutes) from 10 °C to t2 and primary at T1				Maximum power exchange (kW) with primary at T1, secondary within 10-45 °C and constant use of DHW production				DHW continuous production lt/h within 10-45 °C and primary at T1

EXTRA - MODELS AVAILABLE ON REQUEST

For your comfortable choice, Cordivari offers the possibility to realize special customized products. Below you find a list of common requested customized Extra calorifiers and relevant pricelist.

EXTRA 1 PLUS WRB - WITH INCREASED HEAT EXCHANGER SURFACE

Model	Calorifier diameter [mm]	Flange diameter [mm]	Heat exchanger surface [m ²]	Heat exchanger surface [m ²]
200	550	220-300	0,94	1,58
300	650	220-300	1,58	2,27
500	750	220-300	2,27	2,63

EXTRA 1 PLUS WRC - WITH INCREASED HEAT EXCHANGER SURFACE

Model	Calorifier diameter [mm]	Flange diameter [mm]	Heat exchanger surface [m ²]	Heat exchanger surface [m ²]
800	750	220-300	3,17	/
1000	850	220-300	4,54	5,26
1500	950(D)	220-300	5,26	6,34
2000	1100 (D)	220-300	6,34	/

EXTRA 2 WXB - WITH UPPER BLIND FLANGE

Model	Calorifier diameter [mm]	Flange diameter [mm]	Heat exchanger surface 1 [m ²]	Heat exchanger surface 2 [m ²]
200	550	220-300	0,5	Blind flange
300	650	220-300	0,75	Blind flange
500	750	220-300	1.5	Blind flange

EXTRA 2 WXC - WITH UPPER BLIND FLANGE

Model	Calorifier diameter [mm]	Flange diameter [mm]	Heat exchanger surface 1 [m ²]	Heat exchanger surface 2 [m ²]
800	750	300-380	2	Blind flange

APPLICATION

Domestic hot water storage.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

INSULATION

- HARD: High thermal insulation with ecological polyurethane hard foam.
- SOFT: NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

Magnesium anode. Models > 1500 n° 2 magnesium anode.

DRAIN

External confluence through drain connection.

Models > 1000 external confluence through drain pipe.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use for max temperature up to 200°C. Mild steel inspection flange plate with Polywarm®

WARRANTY

5 years - See general sales conditions and warranty

VASO INERZIALE COMPACT

POLYWARM® COATED DOMESTIC HOT WATER ACCUMULATION TANK

APPLICATION

Domestic hot water storage. Suitable for low-ceilinged room.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

INSULATION (DISMOUNTABLE)

NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

2 magnesium anodes.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use for max temperature up to 200°C. Mild steel inspection flange plate with Polywarm®

WARRANTY

5 years - See general sales conditions and warranty

BOLLY® 1 ST

POLYWARM® COATED DOMESTIC HOT WATER CALORIFIER WITH 1 FIXED HEAT EXCHANGER

APPLICATION

Production and storage of domestic hot water.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

HEAT EXCHANGER

1 Polywarm® coated fixed heat exchanger.

INSULATION

- HARD: High thermal insulation with ecological polyurethane hard foam.
- SOFT: NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

Magnesium anode.

DRAIN

External confluence through drain connection.

Models > 500 external confluence through drain pipe.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use for max temperature up to 200°C. Mild steel inspection flange plate with Polywarm®

WARRANTY

5 years - See general sales conditions and warranty

BOLLY® 1 ST- HEAT EXCHANGERS TECHNICAL DATA

Data have been calculated on following basis:

- 1) Primary circuit at T1 and proper energy source;
- 2) Production of DHW in continue way from 10 °C at t2;
- 3) DHW that can be taken in the first 10' and in the first hour from storage at 60°C, input 10°C and output 45°C;
- 4) Sanitary water according to UNI CTI 8065.

Flow rate [m³/h]	3,50	1,75	6	3	6	3

BOLLY® 2 ST

POLYWARM® COATED DOMESTIC HOT WATER CALORIFIER WITH 2 FIXED HEAT EXCHANGERS

APPLICATION

Production and storage of domestic hot water.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

HEAT EXCHANGER

2 Polywarm® coated fixed heat exchangers.

INSULATION

- HARD: High thermal insulation with ecological polyurethane hard foam.
- SOFT: NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

Magnesium anode.

DRAIN

External confluence through drain connection.

Models > 500 external confluence through drain pipe.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use for max temperature up to 200°C. Mild steel inspection flange plate with Polywarm®

WARRANTY

BOLLY® 2 ST- HEAT EXCHANGERS TECHNICAL DATA

Data have been calculated on following basis:

- 1) Primary circuit at T1 and proper energy source;
- 2) Production of DHW in continue way from 10 °C at t2;
- 3) DHW that can be taken in the first 10' and in the first hour from storage at 60°C, input 10°C and output 45°C;
- 4) Sanitary water according to UNI CTI 8065.

UPPER FIXED HEAT EXCHANGER

BOLLY® 1 AP - HIGH PERFORMANCES

POLYWARM® COATED DOMESTIC HOT WATER CALORIFIER WITH 1 FIXED HEAT EXCHANGER

APPLICATION

Production and storage of domestic hot water.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

HEAT EXCHANGER

1 Polywarm® coated fixed heat exchanger

INSULATION

High thermal insulation with ecological polyurethane hard foam.

Grey PVC external lining

CATHODE PROTECTION

Magnesium anode.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use for max temperature up to 200°C. Mild steel inspection flange plate with Polywarm®

WARRANTY

5 years - See general sales conditions and warranty

ACCESSORIES AND SPARE PARTS : See Accessories section for the entire list.

BOLLY® 2 AP - HIGH PERFORMANCES

POLYWARM® COATED DOMESTIC HOT WATER CALORIFIER WITH 2 FIXED HEAT EXCHANGERS

APPLICATION

Production and storage of domestic hot water.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

HEAT EXCHANGER

2 Polywarm® coated fixed heat exchangers

INSULATION

High thermal insulation with ecological polyurethane hard foam.

Grey PVC external lining

CATHODE PROTECTION

Magnesium anode.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use for max temperature up to 200°C. Mild steel inspection flange plate with Polywarm®

WARRANTY

5 years - See general sales conditions and warranty

BOLLY® 2 AP- HEAT EXCHANGERS TECHNICAL DATA

Data have been calculated on following basis:

- 1) Primary circuit at T1 and proper energy source;
- 2) Production of DHW in continue way from 10 °C at t2;
- 3) DHW that can be taken in the first 10' and in the first hour from storage at 60°C, input 10°C and output 45°C;
- 4) Sanitary water according to UNI CTI 8065.

UPPER FIXED HEAT EXCHANGER

Model	Ignition time (minutes) from 10 °C to t2 and primary at T1				Maximum power exchange (kW) with primary at T1, secondary within 10-45 °C and constant use of DHW production				DHW continuous production lt/h within 10-45 °C and primary at T1

BOLLY® 1 CLASSE A

POLYWARM® COATED DOMESTIC HOT WATER CALORIFIER WITH 1 FIXED HEAT EXCHANGER

APPLICATION

Production and storage of domestic hot water.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

HEAT EXCHANGER

1 Polywarm® coated fixed heat exchanger.

INSULATION

High thermal insulation with ecological polyurethane hard foam.

Grey PVC external lining

CATHODE PROTECTION

Magnesium anode.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use for max temperature up to 200°C. Mild steel inspection flange plate with Polywarm®

WARRANTY

5 years - See general sales conditions and warranty

BOLLY® MURALE

HANGED POLYWARM® COATED CALORIFIER FOR D.H.W. PRODUCTION
WITH 1 FIXED HIGH EFFICIENCY HEAT EXCHANGER

APPLICATION

Production and storage of domestic hot water.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS).
Complete with wall brackets

HEAT EXCHANGER

Mild steel Polywarm® coated heat exchanger.

INSULATION

Ecological hard polyurethane foam with high thermal insulation. PVC external lining complete with top cover.

CATHODE PROTECTION

Magnesium anode.

DRAIN

External confluence through drain connection.

WARRANTY

5 years - See general sales conditions and warranty

BOLLY® MURALE - HEAT EXCHANGERS TECHNICAL DATA

Data have been calculated on following basis:

- 1) Primary circuit at T1 and proper energy source;
- 2) Production of DHW in continue way from 10 °C at t2;
- 3) DHW that can be taken in the first 10' and in the first hour from storage at 60°C, input 10°C and output 45°C;
- 4) Sanitary water according to UNI CTI 8065.

INTEGRATED HEAT PUMP

The Bollyterm HP produces DHW thanks to the heat energy naturally present in the air, allowing considerable energy savings.

The functioning of heat pump is based on the exploitation of a particular ecological gas (R134a) that, through its compression and expansion, ensures high performance and cost efficiency.

The energy (heat) is transferred from the air to the water through a condenser coil wrapped outside the tank, avoiding any possible contact between the fluid and the sanitary water, ensuring therefore maximum hygiene and safety.

The output is indicated by the coefficient of performance C.O.P. indicating the relation between used and obtained energy.

SUPPORT

BOLLYTERM® HP 1

POLYWARM® COATED CALORIFIERS WITH INTEGRATED HEAT PUMP AND 1 FIXED HEAT EXCHANGER

APPLICATION

Production and storage of domestic hot water.

MATERIAL

Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

HEAT PUMP

The water inside the tank is warmed up by an integrated insulated compressor heat pump equipped with external condensing coil. A 1500 Watt electric resistance with "BOOST" option is already installed. Electronic gear case with graphic display allows controlling and planning.

HEAT EXCHANGER

1 Polywarm® coated fixed heat exchanger

INSULATION

High thermal insulation with ecological polyurethane hard foam. PVC external lining complete with ABS top and flange cover.

CATHODE PROTECTION

Magnesium anode.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use; Mild steel Polywarm® coated flange plate with electrical immersion resistance.

WARRANTY

5 years (tank)

See general sales conditions and warranty for electrical parts.

INTEGRATED HEAT PUMP

The Bollyterm HP produces DHW thanks to the heat energy naturally present in the air, allowing considerable energy savings.

The functioning of heat pump is based on the exploitation of a particular ecological gas (R134a) that, through its compression and expansion, ensures high performance and cost efficiency.

The energy (heat) is transferred from the air to the water through a condenser coil wrapped outside the tank, avoiding any possible contact between the fluid and the sanitary water, ensuring therefore maximum hygiene and safety.

The output is indicated by the coefficient of performance C.O.P. indicating the relation between used and obtained energy.

EXTRA 1 INOX COMPACT

316 L STAINLESS STEEL CALORIFIERS WITH 1 EXTRACTABLE HEAT EXCHANGER

APPLICATION

Production and storage of domestic hot water. Suitable for low-ceilinged rooms.

MATERIAL

Stainless Steel 316 L suitable for domestic hot water according to D. M. n. 174 dated 06.04.04.

HEAT EXCHANGER

316L Stainless Steel Antilegionella® heat exchanger, with tubes bent to the bottom

INSULATION (DISMOUNTABLE)

NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501. Grey PVC external lining.

CATHODE PROTECTION

2 magnesium anodes.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use; Mild steel exchanger head with anticorrosion treatment.

WARRANTY

5 years - See general sales conditions and warranty

EXTRA 2 INOX

316 L STAINLESS STEEL CALORIFIERS WITH 2 EXTRACTABLE HEAT EXCHANGERS

APPLICATION

Production and storage of domestic hot water.

MATERIAL

Stainless Steel 316 L suitable for domestic hot water according to D.M. n. 174 dated 06.04.04.

HEAT EXCHANGER

2 Stainless steel 316L Antilegionella® heat exchangers (upper exchanger is straight and the other is bent to the bottom).

INSULATION

- HARD: High thermal insulation with ecological polyurethane hard foam.
- SOFT: NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

Magnesium anode. - Models > 1500 n° 2 magnesium anodes.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use; Mild steel exchanger head with anticorrosion treatment.

WARRANTY

5 years - See general sales conditions and warranty

ACCESSORIES AND SPARE PARTS

EXTRA 2 INOX COMPACT

316 L STAINLESS STEEL CALORIFIERS WITH 2 EXTRACTABLE HEAT EXCHANGERS

APPLICATION

Production and storage of domestic hot water. Suitable for low-ceilinged rooms.

MATERIAL

Stainless Steel 316 L suitable for domestic hot water according to D.M. n. 174 dated 06.04.04.

HEAT EXCHANGER

2 Stainless steel 316L Antilegionella® heat exchangers (upper exchanger is straight and the other is bent to the bottom).

INSULATION (DISMOUNTABLE)

NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501. Grey PVC external lining

CATHODE PROTECTION

2 magnesium anodes.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use; Mild steel exchanger head with anticorrosion treatment.

WARRANTY

5 years - See general sales conditions and warranty

EXTRA1 INOX VAPORE

316 L STAINLESS STEEL CALORIFIERS WITH 1 EXTRACTABLE HEAT EXCHANGER

FOR STEAM GENERATOR

APPLICATION

Production and storage of sanitary hot water. Suitable for steam generators.

MATERIAL

Stainless Steel 316 L suitable for domestic hot water according to D.M. n. 174 dated 06.04.04.

HEAT EXCHANGER

1 stainless steel 316L straight heat exchanger suitable for steam power.

INSULATION

- HARD: High thermal insulation with ecological polyurethane hard foam.
- SOFT: NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

Magnesium anode. Models > 1500 n° 2 magnesium anode.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Asbestos-free fiber gaskets

Mild steel exchanger head with anticorrosion treatment.

VASO INERZIALE INOX

316 L STAINLESS STEEL DOMESTIC HOT WATER ACCUMULATION TANK

APPLICATION

Domestic hot water storage

MATERIAL

Stainless Steel 316 L suitable for domestic hot water according to D. M. n. 174 dated 06.04.04.

INSULATION

- HARD: High thermal insulation with ecological polyurethane hard foam.
- SOFT: NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

Magnesium anode. - Models > 1500 n° 2 magnesium anodes.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use; Stainless steel exchanger head.

WARRANTY

5 years - See general sales conditions and warranty

VASO INERZIALE INOX COMPACT

316 L STAINLESS STEEL DOMESTIC HOT WATER ACCUMULATION TANK

APPLICATION

Domestic hot water storage. Suitable for low-ceilinged room.

MATERIAL

Stainless Steel 316 L suitable for domestic hot water according to D. M. n. 174 dated 06.04.04.

INSULATION (DISMOUNTABLE)

NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

2 magnesium anodes.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use; Stainless steel exchanger head.

BOLLY® 2 ST INOX

316 L STAINLESS STEEL DOMESTIC HOT WATER CALORIFIER WITH 2 FIXED HEAT EXCHANGERS

APPLICATION

Production and storage of domestic hot water.

MATERIAL

Stainless Steel 316 L suitable for domestic hot water according to D.M. n. 174 dated 06.04.04.

HEAT EXCHANGER

2 stainless steel 316L fixed heat exchangers

INSULATION

- HARD: High thermal insulation with ecological polyurethane hard foam.
- SOFT: NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

CATHODE PROTECTION

Magnesium anode.

DRAIN

External confluence through drain connection.

GASKET- FLANGE PLATE

Silicone gaskets suitable for alimentary use; Stainless steel exchanger head.

WARRANTY

5 years - See general sales conditions and warranty

COMBI 1 INOX

MULTI-HEAT ENERGY BUFFER WITH 316L STAINLESS STEEL TANK IN TANK CALORIFIER

D.H.W. STORAGE
316L
STAINLESS
STEEL

APPLICATION

Heating hot water storage and D.H.W. production.

MATERIAL

Buffer tank: Mild steel construction with exterior paint. No anti-corrosion treatment required due to the buffer's closed circuit system.

D.H.W. storage: 316L Stainless steel

INSULATION

High thermal insulation with ecological polyurethane hard foam.

Grey PVC external lining

TECHNICAL DESCRIPTION

Multi-Heat Energy tanks Combi1 are used in units with a typically discontinuous energy source for double use: heating system and domestic hot water system.

CATHODE PROTECTION

Chain magnesium anode

WARRANTY

5 years - See general sales conditions and warranty

MULTI-HEAT ENERGY BUFFER WITH 316L STAINLESS STEEL TANK IN TANK CALORIFIER
AND 1 FIXED HEAT EXCHANGER

D.H.W. STORAGE
316L
STAINLESS
STEEL

APPLICATION

Heating hot water storage and D.H.W. production.

MATERIAL

Buffer tank:: Mild steel construction with exterior paint. No anti-corrosion treatment required due to the buffer's closed circuit system.

D.H.W. storage: 316L Stainless steel

HEAT EXCHANGER

1 fixed heat exchanger.

TECHNICAL DESCRIPTION

Multi-Heat Energy tanks Combi2 are used in units with a typically discontinuous energy source for double use: heating systems and domestic hot water systems.

INSULATION

High thermal insulation with ecological polyurethane hard foam.

Grey PVC external lining

CATHODE PROTECTION

Chain magnesium anode

WARRANTY

5 years - See general sales conditions and warranty

Calorifiers for HEAT PUMP

Cordivari Srl is constantly investing in the research of the best solutions for all innovative installations.

Heat pumps heating systems are among the most advanced applications in terms of efficiency, energy-saving and sustainability and the production of domestic hot water (DHW) is a crucial factor of the proper functioning of such installations.

Therefore a calorifier expressly conceived for heat pump systems is a key element in order to maximize the efficiency, the performances, the comfort of use while extending the generator lifecycle.

The need to fulfil all these new challenging applications has lead to the extension of the range of Cordivari calorifiers for heat pumps.

NEW BOLLY® PDC RANGE

**PATENTED
HEAT-EXCHANGE
MODULE**

Bolly® PDC is the result of a continuous research aimed to develop a calorifier unique in its field. It is in fact the only patented system of thermal exchange actually on the market, specifically conceived for installation and heat pumps of latest generation.

The exchange and stratification system is conceived to self-balance: only part of the heated water, proportionate to the temperature achieved during the thermal exchange, is inserted in the tank from the top. This way the water inserted in the upper part is at maximum desired temperature while fresh water coming from the lower part of the tank goes to the exchanger.

This leads to many advantages such as the increased efficiency of the heat pump C.o.p, the achievement of a perfect thermal stratification, that allows to profit immediately of the heated water. This also allows to heat only part of the tank reducing energy waste.

The innovative Bolly® PDC, combined with a heat pump and thanks to the new patented exchange group is able to guarantee 30 % higher performances compared to a generic, traditional calorifier in terms of ignition time and thermal exchange efficiency.

Laboratory tests and researches conducted on the stratification process confirm the use of Bolly® PDC in a heat pump installation means an increased comfort and about a 15% reduction of electric consumption while extending the generator lifecycle reducing its turning on/off.

500 l. Bolly PDC tank heating, connected to 12kW heat pump

BOLLY® PDC
Upper loading and improved thermal stratification thanks to the patented heat exchanger group.

— T1 HEAT PUMP — T2 HEAT PUMP — DHW Temperature

😊 -30% ignition time and consequent better efficiency of HP in heating/cooling phase.

😊 70 L. of DHW at 45° in just 15 minutes, with possibility to heat only the necessary required water volume.

😊 Optimizing the time necessary for the HP for heating and cooling the room.

😊 Energy produced by the HP will be concentrated in the upper part of the storage volume.

500 l. standard tank heating, connected to 12kW heat pump

— T1 HEAT PUMP — T2 HEAT PUMP — DHW Temperature

😞 Significantly longer ignition time.

😞 Lower DeltaT between primary circuit and storage temperature, with relevant efficiency decrease.

😞 General lower comfort on installation.

😞 Necessity to heat the complete volume of storage tank

Standard Calorifiers with no thermal stratification device needs always to be heated completely

TERMOMAS® 1 PDC

HEATING WATER BUFFER TANK FOR HEAT PUMP WITH MACS® MODULE
FOR IMMEDIATE DHW PRODUCTION

APPLICATION

Heating water storage and immediate Domestic Hot Water (DHW) production at high flow rate and performance. Primary storage temperatures can be rather low.

TECHNICAL DESCRIPTION

Expressly designed to be connected to heat pump, Termomas PDC models have the following advantages:

- easy maintenance
- maximum hygiene for anti-legionellosis bacteria
- more DHW production at low primary storage temperatures
- heating water storage optimization.

MATERIAL

Mild steel outside painted. There is no need of any anti-corrosion treatment due to the fact that the buffer is in a closed circuit without any adding air.

D.H.W. HEAT EXCHANGER

Plate to plate stainless steel exchanger in external MACS® module for immediate D.H.W. production.

INSULATION

Buffer tank: High thermal insulation with ecological polyurethane hard foam.

MACS® Module: insulating PPE cover.

Grey PVC external lining

WARRANTY

5 years (tank)

See general sales conditions and warranty for electrical parts.

ECO COMBI 1 PDC

MULTI-HEAT ENERGY BUFFER FOR HEAT PUMP
WITH 316L STAINLESS STEEL DHW CORRUGATED PIPE

APPLICATION

Heating hot water storage and D.H.W. production.

MATERIAL

- **BUFFER TANK:** made in mild steel outside painted. There is no need of any anti-corrosion treatment due to the fact that the buffer is in a closed circuit without any adding air.
- **DHW STORAGE:** 316L stainless steel corrugated pipe, suitable drinkable water according to D.M. n. 174 dated 06.04.04.

TECHNICAL DESCRIPTION

Multi-heat Energy tanks EcoCombi 1 are used in units with a typically discontinuous energy source for double use: heating system and domestic hot water.

- Heating system with a biomass generator as energy source, combining the possibility to produce domestic hot water. In such case, storage heating volume allows the generator to regularly work, limiting number of stops due to the inadequate energy request of the heating system. Moreover, it limits the emission of smoke and creation of corrosive condensate (smokes side).

- In this system, the high potentiality of the Eco Combi allows to obtain a good DHW production, even if temperatures of the primary system are not so high (e.g. using heating pumps as primary source and solar source as support).

The particular shape of the corrugated pipe is avoiding any problem relating to the DHW storage and ensure high heating exchange performances.

INSULATION

High thermal insulation with ecological polyurethane hard foam. Grey PVC external lining

WARRANTY

5 years - See general sales conditions and warranty

ECO COMBI 3 PDC

MULTI-HEAT ENERGY BUFFER FOR HEAT PUMP

WITH 316L STAINLESS STEEL DHW CORRUGATED PIPE AND 2 FIXED HEAT EXCHANGERS

APPLICATION

Heating hot water storage and D.H.W. production.

MATERIAL

- **BUFFER TANK:** made in mild steel outside painted. There is no need of any anti-corrosion treatment due to the fact that the buffer is in a closed circuit without any adding air.
- **DHW STORAGE:** 316L stainless steel corrugated pipe, suitable drinkable water according to D.M. n. 174 dated 06.04.04.

HEAT EXCHANGERS:

2 fixed heat exchangers.

TECHNICAL DESCRIPTION

Multi-heat Energy tanks EcoCombi 3 are used in units with a typically discontinuous energy source for double use: heating system and domestic hot water.

- Heating system with a biomass generator as energy source, combining the possibility to produce domestic hot water. In such case, storage heating volume allows the generator to regularly work,

limiting number of stops due to the inadequate energy request of the heating system. Moreover, it limits the emission of smoke and creation of corrosive condensate (smokes side).

- In this system, the high potentiality of the Eco Combi allows to obtain a good DHW production, even if temperatures of the primary system are not so high (e.g. using heating pumps as primary source and solar source as support).

The particular shape of the corrugated pipe is avoiding any problem relating to the DHW storage (less, stagnation, bacterium, etc.) and ensure high heating exchange performances.

INSULATION

High thermal insulation with ecological polyurethane hard foam. Grey PVC external lining

WARRANTY

5 years - See general sales conditions and warranty

ACCESSORIES AND SPARE PARTS

PUFFER 1

HEATING WATER BUFFER TANK WITH 1 FIXED HEAT EXCHANGER

APPLICATION

Efficient storage of heating hot water mostly using biomass, heat pumps or solar thermal energy sources.

MATERIAL

Mild steel outside painted. There is no need of any anti-corrosion treatment due to the fact that the buffer is in a closed circuit without any adding air.

HEAT EXCHANGER

1 mild steel fixed heat exchanger

TECHNICAL DESCRIPTION

Used to improve flexibility of pellets, stoves and burners. PUFFER 1 are used in units with a typically discontinuous energy source such as biomass boiler and solar thermal system.

PUFFER 1 allows the solar energy system integration.

INSULATION

- HARD: High thermal insulation with ecological polyurethane hard foam.
- SOFT: NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top and flange cover

WARRANTY

5 years - See general sales conditions and warranty

PUFFER 1 FIXED HEAT EXCHANGER POWERS CHART

Thermal output is given in both kW or kcal/h in terms of average temperature difference between primary and secondary circuit, all for a range of primary 3 m³/h. For example, a PUFFER 1 T of 1000 liters Capacity with a water flow of 3 m³/h at 80 °C inlet and outlet at 70 °C, has on the storage of water an average temperature of 60 °C, the mean difference of temperature will be:
 $(80 + 70) / 2 - 60 = 15$ °C and therefore you can exchange up to approximately 34 kW.

Output of the lower heat exchangers PUFFER 1 depending on the average DeltaT between primary and accumulation considering flow rate 3 m³/h.

PUFFER 1 FIXED HEAT EXCHANGER PRESSURE LOSS

PUFFER 2 - UPPER FIXED HEAT EXCHANGER POWERS CHART

For lower exchanger power data see PUFFER 1

Output of the lower heat exchangers PUFFER 2 depending on the average DeltaT between primary and accumulation considering flow rate 3 m³/h.

PUFFER 2 UPPER FIXED HEAT EXCHANGER PRESSURE LOSS

For lower exchanger power data see PUFFER 1

PUFFER 1 CTS®

STORAGE BUFFER TANKS FOR HEATING WATER WITH STRATIFICATION DEVICE
AND 1 FIXED HEAT EXCHANGER

APPLICATION

Efficient storage of heating hot water mostly using biomass, heat pumps or solar thermal energy sources.

MATERIAL

Mild steel outside painted. There is no need of any anti-corrosion treatment due to the fact that the buffer is in a closed circuit without any adding air.

HEAT EXCHANGER

1 mild steel fixed heat exchanger with CTS® stratificator system.

TECHNICAL DESCRIPTION

Used to improve flexibility of pellets, stoves and burners. PUFFER 1 CTS® are used in units with a typically discontinuous energy source such as biomass boiler and solar thermal systems.

PUFFER 1 CTS® is characterized by multiple stratification system based on the combination of Cordivari Labyrinth spreader for returning heating water with a new stratification device that conveys

in the upper part of the tank the water heated up by the lower fixed heat exchanger. This combination ensures a perfect natural stratification inside the tank with no valve or additional external device.

The lower fixed exchanger allows the possibility of connecting with a solar system. Positioned at the bottom lower part of the buffer tank and with very small footprint, it increases the volume available for the storage.

INSULATION

High thermal insulation with ecological hard polyurethane foam. Grey PVC external lining

WARRANTY

5 years - See general sales conditions and warranty

COMBI 1

MULTI-HEAT ENERGY BUFFER WITH POLYWARM® COATED TANK IN TANK CALORIFIER FOR D.H.W.

APPLICATION

Heating hot water storage and D.H.W. production.

MATERIAL

Buffer tank: Mild steel construction with exterior paint. No anti-corrosion treatment required due to the buffer's closed circuit system.

D.H.W. storage: Mild steel Polywarm® coated (Attestation ACS - SSICA - DVGW - W270 - UBA - WRAS)

TECHNICAL DESCRIPTION

Multi-Heat Energy tanks Combi1 are used in units with a typically discontinuous energy source for double use: heating system and sanitary hot water system.

INSULATION

- **HARD:** High thermal insulation with ecological polyurethane hard foam.
- **SOFT:** NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

Grey PVC external lining complete with top cover

CATHODE PROTECTION

Chain magnesium anode

WARRANTY

5 years - See general sales conditions and warranty

ACCESSORIES AND SPARE PARTS

COMBI 2 - COMBI 3 - LOWER FIXED HEAT EXCHANGERS POWERS CHART

Output of the Combi 2 - Combi 3 lower heat exchangers depending on the average DeltaT between primary and accumulation considering flow rate 3 m³/h.

Thermal output is given in both kW or kcal/h in terms of average temperature difference between primary and secondary circuit, all for a range of primary 3 m³/h.

For example, a 1000 liters COMBI 2 with a water flow of 3 m³/h at 80 °C inlet and outlet at 70 °C, has on the storage of water an average temperature of 60 °C, the mean difference of temperature will be:

$(80 + 70) / 20 - 60 = 15$ °C and therefore you can exchange up to approximately 32 kW.

COMBI 3 - UPPER FIXED HEAT EXCHANGERS POWERS CHART

Output of the Combi 3 upper heat exchangers depending on the average DeltaT between primary and accumulation considering flow rate 3 m³/h

ECO-COMBI 1

MULTI-HEAT ENERGY BUFFER WITH 316L STAINLESS STEEL D.H.W. CORRUGATED PIPE

APPLICATION

Heating hot water storage and D.H.W. production.

MATERIAL

- **BUFFER TANK:** Mild steel construction with exterior paint. No anti-corrosion treatment required due to the buffer's closed circuit system.
- **D.H.W. STORAGE:** 316L stainless steel corrugated pipe, suitable for drinkable water according to D. M. n. 174 dated 06.04.04

TECHNICAL DESCRIPTION

- Heating system with a biomass generator as energy source, combining the possibility to produce hot water for sanitary use. In such case, storage heating volume allows the generator to regularly work, limiting number of stops due to the inadequate energy request of the heating system. Moreover, it limits the emission of smoke and the creation of corrosive condensate (smokes side).
- Domestic hot water production systems for domestic and sanitary use where heating water is stored. In this system, the high

potentiality of the Eco Combi allows to obtain a good production of hot sanitary water even if temperatures of the primary system are not so high (i.e using heating pumps as primary source and solar source as support)

The particular shape of the corrugated pipe is avoiding any problem relating to the storage of sanitary hot water and ensure high heating exchange performances.

INSULATION

- **HARD:** High thermal insulation with ecological polyurethane hard foam.
- **SOFT:** NOFIRE® polyester fleece 100% made of recyclable material, with high thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

ECO COMBI 2 - ECO COMBI 3 LOWER FIXED HEAT EXCHANGERS POWERS CHART

Output of the EcoCombi 2 - EcoCombi 3 lower heat exchangers depending on the average DeltaT between primary and accumulation considering flow rate 3 m³/h.

Thermal output is given in both kW or kcal/h in terms of average temperature difference between primary and secondary circuit, all for a range of primary 3 m³/h.

For example, a 1000 liters ECOCOMBI 2 with a water flow of 3 m³/h at 80 °C inlet and outlet at 70 °C, has on the storage of water an average temperature of 60 °C, the mean difference of temperature will be:

$(80 + 70) / 20 - 60 = 15$ °C and therefore you can exchange up to approximately 32 kW.

ECO COMBI 3 UPPER FIXED HEAT EXCHANGERS POWERS CHART

Output of the EcoCombi 3 upper heat exchangers depending on the average DeltaT between primary and accumulation considering flow rate 3 m³/h.

PRESSURE LOSS - LOWER FIXED HEAT EXCHANGER ECO COMBI 2 - ECO COMBI 3

PRESSURE LOSS - UPPER FIXED HEAT EXCHANGER ECO COMBI 3

ECO-COMBI 1 DOMUS

MULTI-HEAT ENERGY BUFFER WITH 316L STAINLESS STEEL D.H.W. CORRUGATED PIPE

APPLICATION

Heating hot water storage and D.H.W. production. Engineered for low-ceilinged rooms.

MATERIAL

- **BUFFER TANK:** Mild steel construction with exterior paint. No anti-corrosion treatment required due to the buffer's closed circuit system.
- **D.H.W. STORAGE:** 316L stainless steel corrugated pipe, suitable for drinkable water according to D. M. n. 174 dated 06.04.04.

TECHNICAL DESCRIPTION

Multi-Heat Energy tanks EcoCombi 2 Domus are used in units with a typically discontinuous energy source for double use: heating system and domestic hot water systems.

- Heating system with a biomass generator as energy source, combining the possibility to produce hot water for sanitary use. In such case, storage heating volume allows the generator to regularly work, limiting number of stops due to the inadequate energy request of the heating systems. Moreover, it limits the emission of smoke

and the creation of corrosive condensate (smokes side).

- Domestic hot water production systems for domestic and sanitary use where heating water is stored. In this system, the high potentiality of the Eco Combi allows to obtain a good production of hot sanitary water even if temperatures of the primary system are not so high (i.e using heating pumps as primary source and solar source as support).

The particular shape of the corrugated pipe avoids any problem relating to the storage of sanitary hot water and ensures high heating exchange performances.

INSULATION

High thermal insulation with ecological hard polyurethane foam. Grey PVC external lining complete with top cover.

WARRANTY

5 years - See general sales conditions and warranty

PUFFERMAS® 1

HEATING WATER BUFFER TANK WITH MACS® MODULE FOR IMMEDIATE D.H.W. PRODUCTION

APPLICATION

Storage of heating hot water and immediate production of D.H.W. high flow rate.

MATERIAL

Mild steel construction with exterior paint. No anti-corrosion treatment required due to the buffer's closed circuit system.

D.H.W. HEAT EXCHANGER

Plate to plate stainless steel exchanger in external MACS® module for immediate D.H.W. production.

TECHNICAL DESCRIPTION

The immediate and fast production of D.H.W. granted by the outside system steel plate exchange allows the following benefits:

- to reduce dimensions of the water heater needed
- easy maintenance
- maximum hygiene for anti-legionellosis bacteria's
- to produce more DHW than the quantity obtained by boiler with

similar capacity because heating hot water is stored at an higher temperature than DHW

INSULATION

Buffer tank: High thermal insulation with ecological hard polyurethane foam. Models 800-1000 available with dismountable hard foam insulation

MACS® module: insulating PPE cover.

Grey PVC external lining

WARRANTY

5 years (tank)

See general sales conditions and warranty for electrical parts.

MACS® module is an external unit that immediately produces hot domestic water, using the heat energy stored in the Buffer thanks to the stainless steel plate exchanger, granting safety and comfort with the possibility to regulate outlet temperature.

MACS® module is equipped with a thermostatic mixer in the heating water inlet (primary) from the buffer avoiding the plate exchanger to overheat reducing risk of formation of calcium deposit.

MACS® module is an external unit that immediately produces hot domestic water, using the heat energy stored in the Buffer thanks to the stainless steel plate exchanger, granting safety and comfort with the possibility to regulate outlet temperature.

MACS® module is equipped with a thermostatic mixer in the heating water inlet (primary) from the buffer avoiding the plate exchanger to overheat reducing risk of formation of calcium deposit.

P.E.D. product designed and produced in conformity to the article 4.3 of directive 2014/68/UE - ErP Ecodesign directive 2009/125/CE

HEATING WATER BUFFER TANK WITH 2 FIXED HEAT EXCHANGERS AND
MACS® MODULE FOR IMMEDIATE D.H.W. PRODUCTION

APPLICATION

Storage of heating hot water and immediate production of D.H.W. high flow rate.

MATERIAL

Mild steel construction with exterior paint. No anti-corrosion treatment required due to the buffer's closed circuit system.

D.H.W. HEAT EXCHANGER

Plate to plate stainless steel exchanger in external MACS® module for immediate D.H.W. production.

HEATING WATER HEAT EXCHANGER

2 fixed heat exchangers

TECHNICAL DESCRIPTION

The immediate and fast production of D.H.W. granted by the outside system steel plate exchange allow the following benefits:

- to reduce dimensions of the water heater needed
- easy maintenance
- maximum hygiene for anti-legionellosis bacteria's

- to produce more DHW than the quantity obtained by boiler with similar capacity because heating hot water is stored at an higher temperature than DHW

INSULATION

Buffer tank: High thermal insulation with ecological hard polyurethane foam. Models 800-1000 available with dismantable hard foam insulation

MACS® module: insulating PPE cover.

Grey PVC external lining

WARRANTY

5 years (tank)

STORAGE BUFFER TANKS FOR HEATING WATER WITH STRATIFICATION DEVICE, 1 FIXED HEAT EXCHANGER AND MACS® D.H.W. STATION FOR INSTANTANEOUS PRODUCTION OF SANITARY WATER

APPLICATION

Storage of heating hot water with stratification device and D.H.W. immediate production with high flow rate.

MATERIAL

Mild steel construction with exterior paint. No anti-corrosion treatment required due to the buffer's closed circuit system.

D.H.W. HEAT EXCHANGER

Plate to plate stainless steel exchanger in external MACS® module for immediate D.H.W. production.

HEATING WATER HEAT EXCHANGER

1 mild steel fixed heat exchanger.

TECHNICAL DESCRIPTION

The immediate and fast production of D.H.W. granted by the outside system steel plate exchange allow the following benefits:

- to reduce dimensions of the water heater needed
- easy maintenance
- maximum hygiene for anti-legionellosis bacteria's
- to produce more DHW than the quantity obtained by calorifier with similar capacity because heating hot water is stored at an higher temperature than DHW.

Puffermas 2 CTS® is characterized by multiple thermal stratification system based on the combination of Cordivari Labyrinth spreader for returning heating water (both from heating installation and from

MACS® DHW station) with a new stratification device that conveys in the upper part of the tank the water heated up by the lower fixed exchanger. This combination ensures a perfect natural stratification inside the tank with no valve or additional external device.

The lower fixed exchanger allows the possibility of connecting with a solar system. Being positioned at the bottom lower part of the buffer tank and with very small footprint, it increases the volume available for the storage.

INSULATION

Buffer tank: High thermal insulation with ecological hard polyurethane foam. Models 800-1000 available with dismountable hard foam insulation

MACS® module: insulating PPE cover.

Grey PVC external lining

PUFFERMAS® 2 CTS POWER

HEATING WATER BUFFER TANK WITH 1 FIXED HEAT EXCHANGER, INTEGRATED SOLAR CIRCULATION GROUP, MACS® MODULE FOR IMMEDIATE D.H.W. PRODUCTION

APPLICATION

Storage by stratification of heating water, instantaneous production of domestic hot water (DHW) with high flows and performances and also management of the solar circulation, in solar thermal system / biomass boiler.

MATERIAL

Mild steel construction with exterior paint. No anti-corrosion treatment required due to the buffer's closed circuit system.

D.H.W. HEAT EXCHANGER

Plate to plate stainless steel exchanger in external MACS® module for immediate D.H.W. production.

SOLAR STATION:

Solar station cabled components on the tank (circulation group- Professional central unit with 5 temperature probes)

HEATING WATER HEAT EXCHANGER

1 mild steel fixed heat exchanger.

TECHNICAL DESCRIPTION

Specific for accumulation and management of the heat produced by the thermal solar system, combines the use of the Puffer's characteristics with the ones of a fast DHW producer without the storage of domestic hot water, with the following advantages:

- to reduce dimensions of the water heater needed
- easy maintenance
- maximum hygiene for anti-legionellosis bacteria's
- to produce more DHW than the quantity obtained by boiler with similar capacity because heating hot water is stored at an higher temperature than DHW.

INSULATION

Buffer tank: High thermal insulation with ecological hard polyurethane foam. Models 800-1000 available with dismountable hard foam insulation

Macs® module and solar circulation group: insulating PPE cover.

Grey PVC external lining

WARRANTY

5 years (tank)

See general sales conditions and warranty for electrical parts.

PUFFERMAS® 3 CTS POWER

HEATING WATER BUFFER TANK WITH 2 FIXED HEAT EXCHANGERS, INTEGRATED SOLAR CIRCULATION GROUP, MACS® MODULE FOR IMMEDIATE D.H.W. PRODUCTION

APPLICATION

Storage by stratification of heating water, instantaneous production of domestic hot water (DHW) with high flows and performances and also management of the solar circulation, in solar thermal system / biomass boiler.

MATERIAL

Mild steel construction with exterior paint. No anti-corrosion treatment required due to the buffer's closed circuit system.

D.H.W. HEAT EXCHANGER

Plate to plate stainless steel exchanger in external MACS® module for immediate D.H.W. production.

SOLAR STATION:

Solar station cabled components on the tank (circulation group- Professional central unit with 5 temperature probes)

HEATING WATER HEAT EXCHANGER

2 mild steel fixed heat exchangers.

TECHNICAL DESCRIPTION

Specific for accumulation and management of the heat produced by the thermal solar system, combines the use of the Puffer's characteristics with the ones of a fast DHW producer without the storage of domestic hot water, with the following advantages:

- to reduce dimensions of the water heater needed
- easy maintenance
- maximum hygiene for anti-legionellosis bacteria's
- to produce more DHW than the quantity obtained by boiler with similar capacity because heating hot water is stored at an higher temperature than DHW.

INSULATION

Buffer tank: High thermal insulation with ecological hard polyurethane foam. Models 800-1000 available with dismountable hard foam insulation

Macs® module and solar circulation group: insulating PPE cover.

Grey PVC external lining

WARRANTY

5 years (tank)

See general sales conditions and warranty for electrical parts.

ACCESSORIES AND SPARE PARTS

PLATE HEAT EXCHANGER

Cordivari plate heat exchangers, are offering now an even more complete range of solutions for domestic, residential and commercial applications. A wide and flexible proposal, both for brazed exchangers of small dimensions, or plate-to-plate exchangers for a greater heat exchange. New range of exchangers, thanks to various dimensions and types, to connections from DN32 to DN100, to different and extended working pressure limits, allows to meet any plant requirements or plumbing need. From small single-family house sourced by boiler or pellet stove, to big plants, every installation finds today the most suitable Cordivari solutions

thanks to the new on-line professional dimensioning tool where you can always find the best performing solution and the most

Economical as well.

NEW PHC INSPECTABLE PLATE HEAT EXCHANGERS

PHC heat exchangers are used in all domestic and industrial installations where a fluid exchange is required.

They are suitable for D.H.W production, (instantaneous or with a storage tank), for the heating of swimming pools using different energy sources (traditional gas boiler, biomass, solar thermal systems). PHC heat exchangers can also be applied in district heating installations, in heat recovery systems, for the hydraulic separation of installations.

The new range offers 6 main models that combined with the variability of the plates number, of the gaskets, of the working pressure limits allows to meet any plant requirements or plumbing need.

Being inspectable, the PHC exchangers are recommended for all plants where an efficient but flexible heat exchanger is required, allowing easily maintenance and cleaning.

PHC exchanger are designed for all applications stated on Art. 4.3 of the Pressure Equipment Directive (P.E.D.) 2014/68/UE.

NEW SLB BRAZED PLATE HEAT EXCHANGERS

New SLB Plate Heat Exchangers provide the most compact and economical solution in all domestic and industrial installations where a heat exchange is required.

The technology is based on the joining by 99% pure copper brazing of multiple 316L stainless steel plates.

The new range offers 4 main models available in insulated or not-insulated version designed to satisfy all possible thermal exchange needs.

SLB Heat Exchangers are designed for D.H.W. production or for heating, refrigeration, evaporation, industrial processing, cooling.

PLATE HEAT EXCHANGERS

WORKING CONDITION

Max pressure	Max temperature
10/16 bar	140 °C (*)

(*) Is intended as maximum working temperature of Gaskets. The maximum operating temperature must be lower between those corresponding to the vapor pressure of 0.5 bar above the pressure in normal atmospheres considered for two circulating fluids. For a use of temperatures above 110 °C please see the TECHNICAL SUPPORT section

APPLICATION

PHC Heat exchangers are used in domestic and industrial installation. In particular they're suitable for production of D.H.W., as well as for heating of swimming pools using different energy sources (traditional boiler, solid fuel, solar thermal system). For domestic application, the PHC are suitable for district heating installation.

MATERIAL

- Frame (not in contact with fluids) in painted mild steel
- Guide for Heat exchanger plates, bolts and screw nuts (not in contact with fluids) in galvanized mild steel
- Nipples and plates (in contact with fluid) in 316L Stainless Steel
- EPDM Gaskets.

TECHNICAL DESCRIPTION

PHC exchangers are inspectionable plate to plate type. Their shape ensures the possibility of opening the exchanger for cleaning.

The modular design allows you to change the configuration of the exchanger even after a period of use (within certain limits).

PHC exchangers are designed for the use stated on Art. 3.3 of PED 97/23/CE. In particular, they are intended to be used with non-dangerous liquids with steam pressure at maximum operating temperature not exceeding 0.5 bar above normal atmospheric pressure. Every Exchanger has serial number label and end-user manual.

CHEMICAL COMPATIBILITY

Material used for PHC Exchangers are suitable for following liquids:

- Water • WATER POOL • Milk • Whisky • Acetone • Glycole • Glycoled Water • Mineral Water • Wine • Wine Vinegar • Etanol • Etilenic Glycole • De-mineralized Water • Acetic Acid • Beer • Liquors • Methanol • Propylenic Glycol

BRAZED PLATE EXCHANGERS SLB 15

TECHNICAL DESCRIPTION

New brazed Plate Exchangers SLB Cordivari, provides the most compact and economical solution suitable for many applications.

The SLB plate exchangers are designed for different needs in heating, refrigeration, evaporation, industrial processing, cooling.

MAIN ADVANTAGES:

- High Efficiency
- Long lasting
- Savings
- High reliability
- Huge possibility to modify the relation between storage volume and Heat exchange.

TECHNICAL CHARACTERISTIC :

AISI 316 L Stainless steel brazed plate, braze-welded with 99,99% pure copper

BRAZED PLATE EXCHANGERS SLB 20

Connections 3/4" M	Max. Flow Rate
[mm]	[m³/h]
A 73	3,6
B 311	
C 40	
D 278	

TECHNICAL DESCRIPTION

New brazed Plate Exchangers SLB Cordivari, provides the most compact and economical solution suitable for many applications.

The SLB plate exchangers are designed for different needs in heating, refrigeration, evaporation, industrial processing, cooling.

MAIN ADVANTAGES:

- High Efficiency
- Long lasting
- Savings
- High reliability
- Huge possibility to modify the relation between storage volume and Heat exchange.

TECHNICAL CHARACTERISTIC :

- AISI 316 L Stainless steel brazed plate, braze-welded with 99,99% pure copper
- High efficiency PPE insulation (**INSULATED VERSION**)

MACS® MODULE

MODULE FOR IMMEDIATE D.H.W. PRODUCTION

APPLICATION

MACS® module produces instantly D.H.W. with high flow rate.

HEAT EXCHANGERS, MATERIAL

Copper circuitry, fittings and valves in brass.

316L stainless steel brazed plate heat exchanger with a thermostatic mixer in the Entry heating water from the buffer avoiding the plate exchanger to overheat and reducing risk of calcium deposits. Module's frame in PPE protecting and insulating the heat exchanger and circuits.

TECHNICAL INFORMATION

MACS® module produces instantly D.H.W. with high flow rate and without storage of water.

The immediate and fast production of D.H.W. granted by the external plate exchanger system allow the following benefits:

- reduced dimensions for DHW productions
- easy maintenance
- maximum hygiene for anti-legionellosis bacteria's
- to produce more DHW than the quantity obtained by water heater with similar capacity thanks to the heating water stored at an higher temperature than DHW.

WARRANTY

2 years

See general sales conditions and warranty.

MANUAL THERMOSTATIC REGULATION

MACS® is connected to the buffer tank, and its 316L stainless steel heat exchanger produce hot domestic water, using the heat energy stored in the Buffer thanks granting safety and comfort with the possibility to regulate outlet temperature.

MACS® module

Accessories on request

Recirculation kit

Art. Nr.
5221000000054
Control display + pump (for D.H.W.)

The use of Cordivari's recycling kit allows to manage on the system a link of the DHW recycling.

The benefit consists of improving the comfort for the user by reducing the waste of domestic water and producing DHW immediately at the right temperature.

In particular, the Cordivari electronic recycling kit allows to:

- Maximize the energy saving by setting the program of recycling temperature based on personal habits.
- Daily and weekly scheduling to manage until 8 time slots for each days of the week
- Constantly monitoring the working and the efficiency of the recycle tanks to the self-diagnostics of the system
- Work also without the temperature's probe, through programmable temporary actions.

O	D.H.W. recirculation control display (optional)

MACS® TECHNICAL DATA CHART

The curves in below charts are useful to calculate the flow rate of DHW product by a MACS® module unit depending on the DHW desired temperature (value reported on the horizontal axis)

The various curves are determined according to 3 parameters: the temperature of the storage tank; the temperature of the heating water flow returning to the storage tank and the inlet temperature of the DHW water.

ELECTRONIC MACS® MODULE

MODULE FOR IMMEDIATE D.H.W. PRODUCTION WITH ELECTRONIC CONTROL UNIT

APPLICATION

MACS® module produces instantly D.H.W. with high flow rate.

EXCHANGER, MATERIAL

Copper primary pipes, 316L stainless steel DHW sanitary circuit; brass fittings and valve.

316L stainless steel brazed plate heat exchanger.

PPE module case housing and insulating the exchangers circuits.

TECHNICAL DESCRIPTION

MACS® module produces instantly D.H.W. with high flow rate and without storage of water.

Thanks to a variable flow rate on the primary the risk of limescale formation on the sanitary side is highly reduced

The immediate and fast production of D.H.W. granted by the external plate exchanger system allow the following benefits:

- reduced dimensions for DHW productions
- easy maintenance
- maximum hygiene for anti-legionellosis bacteria's
- to produce more DHW than the quantity obtained by water heater with similar capacity thanks to the heating water stored at an higher temperature than DHW.

WARRANTY

D.H.W. recirculation kit

The recirculation kit for Electronic MACS® module allows the implementation of a sanitary recirculation ring on the system where modules are installed. The main advantage of such sanitary recirculation ring is to improve comfort and speed in achieving and enjoying the desired DHW temperature, reducing energy waste. The control unit included as standard with electronic MACS® modules allow the complete management of all settings of the recirculation ring, such as temperature, setting etc...

CASCADE MACS® SYSTEM

CASCADE MACS® SYSTEM WITH ELECTRONIC CONTROL UNIT FOR INSTANTANEOUS DHW PRODUCTION ON BIG INSTALLATION

APPLICATION

MACS® module produces instantly D.H.W. with high flow rate even if there is installed a small power thermal generator.

HEAT EXCHANGERS, MATERIAL

Copper circuitry, fittings and valves in brass .

316L stainless steel brazed plate heat exchanger with a thermostatic mixer in the Entry heating water from the buffer avoiding the plate exchanger to overheat reducing risk of formation of calcium deposist. Module's frame in PPE that protects and makes insulated the heat exchanger and the circuit.

TECHNICAL DESCRIPTION

The management of additional MACS module in cascade allows meeting high requirements of DHW.

The complete system manage trough the electronic control unit the working of each module following the request of DHW from

the users.

The cascade configuration can eventually also manage the link of the DHW recycling. The use of the MACS module in cascade takes all the benefits from the MACS module also in big installation where big DHW flows are needed to produce instantaneous DHW without the necessity to accumulate it.

PRS MODULE

MODULE FOR IMMEDIATE DHW PREPARATION

APPLICATION

PRS modules are used for immediate (without storage) Domestic Hot Water production or semi-immediate (with storage) in case of bigger systems, aside from the primary circuit energy source. PRS modules are equipped with a sophisticated management system able to automatically control several installations and punctually manage anti-legionellosis cycles, recording data and their results.

COMPONENTS

- Inspection plate heat exchanger. The exchanger can be opened for a better cleaning in order to keep high hygiene conditions.
- Primary circuit single or double pump. The double pump is suitable for systems that need to be always operating. In case of breakdown, the system automatically starts the second pump and guarantees heating for DHW production.
- Motor-operated mixing valve. The valve mixes the primary fluid passing by the heat plate exchanger, so that the temperature does not go up too much and it reduces the

calcareous deposits inside.

- Electronic panel with PLC. PLC has a software specially designed to manage the PRS with anti-legionellosis cycles recording option.
- Temperature probes.
- Galvanized mild steel frame.

WORKING CONDITION

Max pressure = 10 bar

Max temperature = 140°C (meant as max gaskets operating temperature that has always to be the lowest among the temperatures and is equal to steam tension of 0.5 bar more than the normal atmosphere pressure considered for two circulating fluids).

In case of application at temperature higher than 110°C see TECHNICAL SUPPORT & REGULATIONS section.

WARRANTY

2 years - See general sales conditions and warranty.

TOUCH SCREEN ELECTRONIC PANEL

The electronic panel:

- can automatically control several installations for Domestic Hot Water production;
- is completely adjustable;
- allows PID regulation of the mixing valve on the primary;
- manages the pumps operating conditions of the primary, adjusting the flow rate to the quantity of Domestic Hot Water demanded, so to realize optimal energy efficiency;
- manages the DHW charge and recirculation of the operating pumps;
- allows the constant monitoring of the installation and temperatures progress screening;
- punctually manages the anti-legionellosis cycles, recording temperatures data on a file that can be downloaded by USB port;
- shows temperatures progress during the last anti-legionellosis cycle;
- automatically allows a punctual opening of the drain valve;
- is able to detect and notify a component or primary circuit heat generator malfunction.

PRS MODULE

MODULE FOR IMMEDIATE DHW PREPARATION

INSTALLATION WITH D.H.W. STORAGE

The graphics represent a useful guide to help choosing the suitable PRS module according to all possible exigencies of application. The most common cases are showed such as applications in accommodation facilities or residential facilities.

The applications imply the coupling of the PRS module with VASO INERZIALE for the accumulation of DHW.

According to the size of the installation we indicate the most suitable PRS module together with the VASO INERZIALE at the minimum thermal power supplied by the generator

Applications in accommodation facilities

RAPID HEAT EXCHANGER

TECHNICAL DESCRIPTION

Rapid heat exchangers are made by a double spiral copper coil covered with mild steel tubes. Its particular internal configuration forces the two fluids to go upstream and guarantees a rapid and efficient thermal exchange. They can be used in several ways in thermo-hydraulic domain, such as for DHW production combined with thermo-fireplaces or biomass generators.

APPLICATION

Immediate DHW production .

MATERIAL

Mild steel

HEAT EXCHANGER

Fixed double spiral copper coil heat exchanger.

WARRANTY

2 years

See general sales conditions and warranty.

OPEN EXPANSION VESSEL

304 STAINLESS STEEL / GALVANIZED / POLYETHYLENE

Opened Expansion tanks are used as safety accessories in the heating systems where, due to legal reason it is forbidden to install closed expansion tanks systems. In Italy, for the water fireplaces, they are still one of the most simple and economic solution. Expansion tank is composed by a cover unit where all the security piping of outlet pipe for too full , supplying and systems charge , should arrive. Its rule is to merge the water in excess due caused by temperature increase. Expansion Tank should be placed on the highest point reached by the water and should have an expanding volume not less than the expansion volume developed by all the water contained into the system , whose value should be declared in the project.

Expansion volume needed in the system is calculated by the following formula:
 $V_e = C \times e$
Where C is the water contained into the system and "e" is equal to the difference between the expansion factor of the water at the minimum conceivable temperature with sleeping system and the expansion factor of the water at boiling temperature of atmospheric pressure. Considering the first water temperature equal to 10°C and the boiling one at 100°C
"e" = 0.0431
It is possible to connect more than one tank together.

R-Mix DN25 MODULES

CIRCULATION AND MIXED PUMPS MODULES FOR CENTRAL HEATING INSTALLATION

APPLICATION

Heating water circulator and mixer for central heating installation

MATERIAL

Circuitry, fittings and valves in brass material
Case in PPE, for protecting and insulating the module
Material used for components and accessories suitable for drinkable water according DM 174 dated 06.04.04 and Sect. 9 D.I. 31/2001.

TECHNICAL INFORMATION

R-Mix module are modules designed for the circulation of heating water in closed central heating installations.
The Mixed Unit version of Module DN25 meets all the installation needs with specific models: middle and low temperature heating systems, need of energy metering, cooling systems; everything

with the possibility of a management control by means of climatic controllers even built-in the pump unit.

The Module DN25 equipped with mixing valves, allows an easier installation and relevant using.

By setting the required temperature of heating water on the thermostatic mixing valve, the same will be delivered accordingly to the central heating installation in an automatic and constant way.

WARRANTY

2 years warranty (1 year for electronic components)

See general conditions for sales and warranty terms.

R-Mix DN32 MODULES

CIRCULATION AND MIXED PUMPS MODULES FOR CENTRAL HEATING INSTALLATION

APPLICATION
Heating water circulator and mixer for central heating installation

MATERIAL
Circuitry, fittings and valves in brass material
Case in PPE, for protecting and insulating the module
Material used for components and accessories suitable for drinkable water according DM 174 dated 06.04.04 and Sect. 9 D.L. 31/2001.

TECHNICAL INFORMATIONS
R-Mix module are modules designed for the circulation of heating water in closed central heating installations.
The Mixed Unit version meets all the installation needs with specific models: middle and low temperature heating systems, need of energy metering, cooling systems; everything with the possibility of a management control by means of climatic controllers even built-

in the pump unit.
The Module DN32 equipped with 2-Way pump unit and with 3-way mixing valve with electronic control for the constant temperature allows the maximum reliability in both Heating and Cooling.
The motorized Module DN32 can vary the opening of the mixing valve in order to maintain the inlet water temperature constant allowing the prompt and balanced reaction of the mixer module.

WARRANTY
2 years warranty (1 year for electronic components)
See general conditions for sales and warranty terms.

ACQUA REFRIGERATA INOX

VERTICAL AISI 304 STAINLESS STEEL CHILLED WATER TANK

PRESSURE	TEMPERATURE
Pmax 6 bar	Tmax -10 / +60 °C

TECHNICAL DESCRIPTION

Vertical chilled water tanks are used for air conditioning installations in order to increase the thermal inertia and, for those installations with a low water-capacity, avoiding that the chilling generator is continually working.

MATERIAL

AISI 304 Stainless steel

EXTERNAL LINING

Blue PVC with plastic black caps for connections.

INSULATION

20 mm fixed polyethylene not subject to condensation. Not self-extinguishing version. Not removable from the tank.

20 mm not self-extinguishing insulation.

WARRANTY

2 years

See general sales conditions and warranty.

HANGING VOLANO TERMICO PDC

HANGING ENERGY BUFFER FOR HEAT PUMP

PRESSURE	TEMPERATURE
Pmax 4 bar	Tmax -10 / +95 °C

TECHNICAL DESCRIPTION

Buffers either for hot or cold water have two main functions: they work both as water divisor and energy buffer.

The water divisor makes the heat pump flow rates and terminals flow rates unconnected. The energy buffer function reduces the heat pump starting.

Hanging energy buffers are designed for wall installation.

MATERIAL

Mild steel

EXTERNAL LINING

PVC plastic grey.

INSULATION

High thermal insulation with ecological polyurethane hard foam.

WARRANTY

2 years

See general sales conditions and warranty.

VOLANO TERMICO PDC REVERSO

HEATING WATER STORAGE BOTH FOR HOT AND COLD WATER INSTALLATIONS

TECHNICAL DESCRIPTION

VOLANO TERMICO PDC REVERSO is used in air conditioned systems to store cold water and also in heating systems to store hot heating water at high flow rate. Thanks to the aluminium external lining it is suitable for outdoor installation.

MATERIAL

Mild steel

APPLICATION

Buffer either for hot or cold water

ANTI-CORROSION TREATMENT

The anti-corrosion treatment is not necessary being installed in closed systems.

INSULATION

A layer of insulation not subject to condensation plus a second layer of polyester fleece, all sheltered by an aluminium external lining (removable so to ease the installation)

EXTERNAL LINING

Galvanized and painted metallic cover

CONNECTION FOR ELECTRICAL IMMERSION HEATER

1 1/2" connection for low temperature electrical immersion heater (thermostat from 0 to +50 °C) - see the table below.

VOLANO TERMICO CALDO-FREDDO R/C GB VT

VERTICAL INERTIAL HOT/COLD WATER TANK BOX

PRESSURE	TEMPERATURE
Pmax	Tmax
6 bar	-10 / +90 °C

APPLICATION AND TECHNICAL DESCRIPTION

Storage of chilled or hot water for inverter installations. These buffers are with hard box insulation and an external lining with a galvanized and painted plate, raw inside. They are suited for installation that works with cold water during Summer and hot water during Winter. They also allow to limit the number of switch on/off of the generator (either heat pump, chilled system or standard Generator) increasing the thermic inertia of the system and to have more stable temperatures

MATERIAL

Mild steel

EXTERNAL LINING

Galvanized and painted metallic cover.

INSULATION

High thermal insulation with ecological polyurethane hard foam.

WARRANTY

ACQUA REFRIGERATA GREZZO GC 20 OR

VERTICAL CHILLED NOT TREATED WATER TANK

PRESSURE	TEMPERATURE
Pmax	Tmax
6 bar	-10 / +90 °C

APPLICATION AND TECHNICAL DESCRIPTION

Storage of chilled or hot water for inverter installations.

Vertical inertial water tanks are used for inverter systems in order to increase the thermal inertia and, for those installations with a low water-capacity, avoiding that the chilling generator is continually working.

MATERIAL

Storage of chilled or hot water for inverter installations.

EXTERNAL LINING

Blue PVC with plastic black caps for connections.

INSULATION

- From 100 to 5000 liters: 20 mm fixed polyethylene not subject to condensation. Not self-extinguishing version. Not removable from the tank.

- From 3000 to 5000 liters (increased insulation): 20 mm fixed polyethylene not subject to condensation joined with NOFIRE® 50 mm soft polyester fleece 100% made of recyclable material, with high Thermal insulation. Fire resistance class B-s2d0 according to EN 13501.

WARRANTY

2 years

See general sales conditions and warranty.

Models from 4000 to 10000 are provided with the manhole.

APPLICATION AND TECHNICAL DESCRIPTION

Air cushion pressure vessels.
Suitable to supply water to the highest floors of the buildings and to compensate for the water shortage of the water-works. The air cushion pressure vessels Z PED VT are made for the water pumping and they work as a pressured water lung that, if correctly dimensioned, can limit the self-starting of the pump.
These products are made in galvanized mild steel.

ANTI-CORROSION TREATMENT

These tanks are galvanized inside and outside, with immersion in a pool of fused zinc with purity not below 99,99% (Uni EN 1179)

DOCUMENTS ATTACHED

- CE certification
- User Instructions

CERTIFICATIONS

The Z PED VT pressure vessels are made according to the security policy of the standard 2014/68/UE that rules the pressurized products. Under surveillance of the Notified Body, a CE mark is stuck on them as well as the following project data that characterize the product:

- Pressurized fluid: water + air or nitrogen
- Fluid group: 2
- Max operating pressure: see the table chart
- Temperature: -10/+50 °C

WARRANTY

2 years
See general sales conditions and warranty.

To quickly determine both the capacity of the pressure vessel and the pump according to the number of the flats, you can use the following chart (always valid for 15 self-starting):

APPLICATION AND TECHNICAL DESCRIPTION

Air cushion pressure vessels.

Suitable to supply water to the highest floor of the buildings and to compensate for the water shortage of the water-works.

The air cushion pressure vessels X PED VT are made for the water pumping and they work as a pressured water lung that, if correctly dimensioned, can limit the self-starting of the pump. These products are entirely made in 316L stainless steel.

DOCUMENTS ATTACHED

- CE certification
- User Instructions

CERTIFICATIONS

The X PED VT pressure vessels are made according to the security policy of the standard 2014/68/UE that rules the pressurized products. Under surveillance of the Notified Body, a CE mark is stuck on them as well as the following project data that characterize the product:

- Pressurized fluid: water + air or nitrogen
- Fluid group: 2
- Max operating pressure: see the table chart
- Temperature: -10/+50 °C

VERTICAL GALVANIZED TANK FOR PRESSURIZED COLD WATER STORAGE

**STOCK
AVAILABILITY**

APPLICATION AND TECHNICAL DESCRIPTION

Pressurized cold water storage.

Tanks for pressurized water storage are designed for those water systems that need to store pressurized cold water. They cannot work as pressure vessels.

These products are made in galvanized mild steel.

MATERIAL

These tanks are galvanized inside and outside, with immersion in a pool of fused zinc with pureness not below 99,99% (Uni EN 1179)

WARRANTY

2 years

See general sales conditions and warranty.

300	3911162241005
500	3911162241006

TECHNICAL DESCRIPTION

Vertical V PED expansion vessels with membrane are used for lifted water system and they represent a pressurised water lung that, if duly dimensioned, reduces pump cycling.

The peculiarity of this product is the physic separation between water and air made by the membrane.

APPLICATION

Perfect to ensure water deliveries to the top floors of the building or to work in case of insufficient water supplied by waterworks, or to stabilize pressure in the domestic water supply by absorbing expansion when the water is heated.

MATERIAL

Painted mild steel.

MEMBRANE

Elastic EPDM membrane suitable for drinking water.

CERTIFICATIONS

V PED VT expansion vessels with membrane are produced in accordance with safety disposal of European Directive 2014/68/UE in terms of pressurized.

They are CE labelled with design data:

- pressurized fluid: water+air or nitrogen
- Fluid group: 2
- max. working pressure: 10bar

The peculiarity of this product is the physic separation between water and air made by the membrane.

APPLICATION

Perfect to ensure water deliveries to the top floors of the building or to work in case of insufficient water supplied by waterworks, or to stabilize pressure in the domestic water supply by absorbing expansion when the water is heated.

MATERIAL

External lining: galvanized mild steel.

MEMBRANE

Elastic EPDM foodstuff membrane suitable for drinking water.

CERTIFICATIONS

Z PED OR expansion vessels with membrane are produced in accordance with safety disposal of European Directive 2014/68/UE in terms of pressurized.

They are CE labelled with design data:

- pressurized fluid: water+air or nitrogen

- Fluid group: 2

- max. working pressure: 10bar

COMPRESSED AIR / NITROGEN RECEIVERS (DIRECTIVE 2014/29/CE)

CE

WORKING TEMPERATURE

Tmax

-10/+100 °C

TECHNICAL DESCRIPTION

Compressed air receivers allows to extract more air that the quantity produced by compressor, this without causing an under-pressure in the unit.

Built in mild steel, either painted, galvanized and painted with food internal coating Polywarm® according to D.M. nr. 174 dated 06/04/2004.

APPLICATION

Storage and distribution of compressed air.

MATERIAL

- Painted mild steel (standard colour RAL 5002-Blue)
- Other colours on demand:
 - RAL 5015 - Light Blue
 - RAL 3000 - Red
 - RAL 1021 - Yellow
- Galvanized mild steel
- Painted mild steel version with internal food coating (Polywarm®)

DOCUMENTS ATTACHED

- CE certification - User Instructions

CERTIFICATIONS

Compressed air receivers are produced according to European Directive 2014/29/CE for items with a "volume x pressure" under than 10.000 Bar • Liter. These tanks are marked CE under the monitoring of an external control agency.

- Liquid in pressure: air
- Liquid group: 2
- Maximum working pressure: (See tab)
- Temperature: -10/+100°C

EXAMPLE OF COMPRESSED AIR RECEIVER PLANT

In compressed air production and distribution systems, tanks are used in production plants for the following functions:

- to store compressed air in order to use it when needed
- to ensure network air flow and constant pressure by limiting interventions to adjust the flow;
- to favour the separation of condensation through the release of the flow coming from the compressor in the bottom of the tank and connecting delivery in the upper.

100 Nm³/min, tank capacity is calculated, as a first approximation, with the following relationship:
 $V = 0.2 \text{ to } 0.6 Q$
 V = theoretical volume of the tank in m³
 Q = intake flow rate from the compressor in m³/min
0.2 = coefficient for large plants
0.6 = coefficient for small plants

Furthermore, the tanks are located near uses characterised by highly variable air requirements in order to limit pressure fluctuations along the distribution lines.
Optimum tank volume in a production system depends on the type of compressor, environmental conditions of operation and type of use.
In systems characterised by max operating pressure of 10 bar and flow rates from 1 to

The following schemes are purely illustrative. To realize the installation, always refer to a qualified design engineer.

LOWER HEAT EXCHANGER FOR EXTRA 1,2 3 VT CALORIFIERS

The Antilegionella® coil, which is the heat exchanger with tubes bent to the bottom is an efficient innovation installed as a standard on every Cordivari's Extra calorifiers. This reduces the diffusion of legionellosis bacterium.

Advantages:

- The Antilegionella® curved heat exchanger can heat the complete quantity of water in an homogenous way. Even in the bottom area of the boiler which is impossible with traditional heat exchanger.
- Possibility of using lower capacity boilers for the same quantity of hot water needed. Kit including: exchanger, gaskets, bolts and insulated bushes.

ACCESSORIES AND SPARE PARTS : CALORIFIERS - MULTYFUEL ENERGY CILINDERS

EXCHANGER HEAD FOR "EXTRA 1,2,3" CALORIFIERS

The Flange plate includes 2 sleeve collars for the connection to the operating system. This allows the circulation of the liquid within the heat exchanger's serpentine doing the real separation between the incoming liquid and the outgoing one. The flange plate is in mild steel. Blind flange for accumulation tank in Polywarm® available also with 1 connection. Including: gaskets, bolts and bushes

Art. Nr.	Connection	Diameter [mm]
5206000000001	1"	300
5206000000002	2"	380
5206000000003	2"	430

Includes 2 gaskets, bolts and bushes
Version for pipes heat exchanger

FLANGE PLATE FOR D.H.W. STORAGE TANKS

Art. Nr.	Connection	Diameter [mm]
52060000000051	1" 1/2	300

Includes 1 gasket and bolts
1 connection for electrical immersion (available on accumulation tanks)

Art. Nr.	Diameter [mm]
52060000000101	300
52060000000102	380
52060000000103	430

Includes 1 gasket and bolts
Blind flange available (available on accumulation tanks)

GASKET FOR FLANGE PLATE

Pair of gasket for boilers EXTRA 1,2,3 - includes bolts and bushes.

Art. Nr.	Diameter [mm]
5021220401001	300
5021220401002	380
5021220401003	430

One gasket with crosspiece and one without.
Silicone gaskets suitable for alimentary use for max temperature up to 200°C.

Pair of gasket for boilers EXTRA VAPORE - includes bolts and bushes.

Art. Nr.	Diameter [mm]
5021220460111	300
5021220460112	380
5021220460113	430

One gasket with crosspiece and one without.
Made in material for max. temperature up to 192°C

Pair of gasket for boilers EXTRA PLUS and STORAGE TANKS

Art. Nr.	Diameter [mm]
5021220401013	300

One gasket with crosspiece and one without.
Silicone gaskets suitable for alimentary use for max temperature up to 200°C. 5 UNITS BOX

Pair of gasket for boilers BOLLY® POLYWARM® (800-1000) / INOX STORAGE TANKS

Art. Nr.	Diameter [mm]
5021220401012	240

One gasket with crosspiece and one without.
Silicone gaskets suitable for alimentary use for max temperature up to 200°C. 5 UNITS BOX

Pair of gasket for boilers BOLLY® POLYWARM® (150÷500) / COMBI

Art. Nr.	Diameter [mm]
5021220401011	190

One gasket with crosspiece and one without.
Silicone gaskets suitable for alimentary use for max temperature up to 200°C. 5 UNITS BOX

FLANGE PLATE WITH CONNECTION FOR ELECTRICAL IMMERSION (BOLLY® 1 - BOLLY® 2 POLYWARM®)

Kit includes bolts, bushes and user manual

Art. Nr.	POLYWARM® VERSION
5212000910017	1" 1/2 Flange ø 190 mm-with connection for electrical immersion + flange plate (Bolly® 150÷500)
5212000910018	2" Flange ø 190 mm-with connection for electrical immersion + flange plate (Bolly® 150÷500)
5212000910020	1" 1/2 Flange ø 240 mm-with connection for electrical immersion + flange plate(Bolly® 800÷1000)
5212000910019	2" Flange ø 240 mm-with connection for electrical immersion + flange plate (Bolly® 800÷1000)

52060000000052	2" Flange ø 380 mm-with connection for electrical immersion + flange plate (Bolly® 1500)

Art. Nr.	316L STAINLESS STEEL VERSION
52120000000004	1" 1/2 Flange ø 180mm with connection for electrical immersion + flange plate (Bolly® 150÷1000)
52120000000005	2" Flange ø 180mm with connection for electrical immersion + flange plate (Bolly® 150÷1000)
52120000000006	1" 1/2 Flange ø 240mm with connection for electrical immersion + flange plate (Bolly® 1300÷2000)
52120000000007	2" Flange ø 240mm with connection for electrical immersion + flange plate (Bolly® 1300÷2000)

ACCESSORIES AND SPARE PARTS : CALORIFIERS - MULTYFUEL ENERGY CILINDERS

MAGNESIUM ANODES

The calorifiers corrosion protection is guaranteed not only by the internal coating material but also by the anodes.
As standard, Cordivari provides its calorifiers with magnesium anode and with electronic anode on demand.

SUITABLE FOR ANODEN TESTER

• Use

The Titanium electronic anode is, by opposite to the normal one, not subject to consumption and doesn't need any maintenance or replacement. The protection against corrosion is obtained ensuring the electrolyte power through the continuous energy produced by the titanium bar.

• Material

The anode is composed by a Titanium rod, with its active final part, that has to be connected to the vessel. This system ensures the good working and a long life both to the anode and the cylinder.

• Operating conditions

The input disposal is positioned in a insulated box and it's equipped with a light led, located on front side. Green light=working OK - Red light = Wrong working.

In this last case it's necessary to take the electrical plug away and get in touch with an installer, that will provide to put everything in good order.

• Advantage

1. Active protection through the power given by the titanium anode.
2. High level working flexibility, in order to fit to the different internal coatings and to the water capacity, ensured by an automatic regulation of the working electricity
3. Definitive and easy protection. It is important anyway to check that the electricity is constantly working.
4. Cancellation of any worries and maintenance problems and costs.

ANODEN-TESTER

Art. Nr.	Descrizione
5221000000031	Anoden-tester kit - 2 units box

ANODEN TESTER KIT

It is the new system to keep easily under control by seeing the consumption of the magnesium anode. You have just to push the button to check if the anode has to be replaced. Included with the anoden-tester, cap and boss.

ACCESSORIES AND SPARE PARTS : CALORIFIERS - MULTYFUEL ENERGY CILINDERS

EASY CONTROL : ELECTRONIC DISPLAY FOR CALORIFIERS

- 4 working possibilities . Manual + Daily – Weekly - weekend
- Control of 2 sources and an additional electrical immersion (Power up to 2500 W and running in Manual mode)
- Antilegionelosis programme for time and temperature included with the output for the by-pass electronic-valve to the thermostatic mixer.
- Working control of the system trough the Display
- Alert message for the temperature's probes
- Control of the recycling pump
- Complete with 3 temperature probes

Art. Nr.	Version	Available for

5005000310002	MOUNTED ON TANK	Polyester fleece insulation models
5005000310003	MOUNTED ON TANK	Ecological hard polyurethane foam insulation models

RECYCLING KIT FOR CALORIFIERS AND BUFFER TANKS

Art. Nr.
5221000000054
Control display + pump (for D.H.W.)

The use of Cordivari's recycling kit allows to manage on the system a link of the DHW recycling.

The benefit is to improve the comfort of the user and to reduce the waste and produce DHW immediately at the right temperature.

In particular, the Cordivari electronic recycling kit allows to:

- Maximize the energy saving by programming the recycling temperature on basis of our own habits.
- Daily and weekly scheduling to manage until 8 time slots for each day of the week
- Constantly monitoring the working and the efficiency of the recycle thanks to the self-diagnostics of the system
- Works also without the temperature's probe into system where the probe is not foreseen, through programmable temporary actions.

D.H.W. RECIRCULATION KIT FOR ELECTRONIC MACS® MODULE

Art. Nr. 5221000000073		The recirculation kit for Electronic MACS® module allows the implementation of a sanitary recirculation ring on the system where modules are installed. The main advantage of such sanitary recirculation ring is to improve comfort and speed in achieving and enjoying the desired DHW temperature, reducing energy waste. The control unit included as standard with electronic MACS® modules allow the complete management of all settings of the recirculation ring, such as temperature, setting etc...
D.H.W. circulation pump		

THERMOSTATIC SWITCH VALVE

ART. NR.	Connections
5046000000007	3/4"
5046000000008	1"

Auto-operated thermostatic switch valve, calibrated at 45°C. It can easily integrate solar thermal systems for DHW production with a boiler.

For further information and prices, see Cordivari INTEGRATED SOLAR SYSTEMS catalogue.

5302000000008	1"	11,2	

These valves avoid an overpressure of the air receiver tank and water pressure tank.

The choice of the valve has to be made by the Engineer, according on the maximal pressure of the tank and also considering the drain exit. All valves are provided with a CE conformity certificate from an external laboratory. Installation, maintenance and checking is also ruled according to specific national legislation.

Safety Valve

MANOMETER

They indicate the pressure in the tank. All manometers have a red signed maximum level.

ELASTIC EPDM MEMBRANE

Art. Nr.	Description
5700000410106	for vessel of 24 lt - 10 units box
5700000410107	for vessels 100 lt with flange Ø137 mm - 5 units box
5700000410003	for vessels 200-300 liters and 100 liters with flange Ø 254 mm
5700000410004	for vessels 500 liters
5700000410108	for vessel from 50-60 liters - produced up to 2003 - 5 units box
5700000410109	for vessel from 80 liters - produced up to 2003 - 5 units box

The elastic membrane in EPDM use are mounted on expansion vessels in order to divide the liquid from the gaseous phase. Doing so the circulating water is pure giving to the system the warranty to be suitable for drinking.

ACCESSORIES AND SPARE PARTS FOR AIR COMPRESSOR RECEIVERS

Compressed Air Receivers Kit

Art. Nr.	Descrizione
5303000000001	Kit for 200 up to 710 lt compressed air receivers (11 bar), with security valve of 7.500 l./min P calibration 10,4 bar
5303000000002	Kit for 900 lt compressed air receivers (11 bar), with security valve of 29.300 l./min P calibration 10,4 bar
5303000000003	Kit for 1.000 up to 10.000 lt compressed air receivers (12 bar), with security valve of 31.400 l./min P calibration 11,2 bar
5303000000004	Kit for 1.000 up to 10.000 lt compressed air receivers (8 bar), with security valve of 21.700 l./min P calibration 7,4 bar
5303000000005	Kit for 270 up to 2.000 lt compressed air receivers (15 bar), with security valve of 9.600 l./min P calibration 13,5 bar

Includes a safety valve , a gauge (manometer) and its tap-tray.

A hand is visible on the right side of the image, holding a network diagram. The diagram consists of several white circles connected by solid and dashed white lines. The background is dark and textured.

INSULATIONS

THERMAL INSULATION

Thermal efficiency of calorifiers and buffer tanks Cordivari is optimized with special insulations, that are an essential component for every storing of hot water, keeping stored hot water at high temperature.

Cordivari insulations reduce at minimum level temperature losses, with consequently energy savings.

Insulation on calorifiers and buffer tanks are manufactured using the best available materials.

NOFIRE® POLYESTER FLEECE

Material with low thermal conductivity. From an energetical and ecological point of view, the polyester fleece is one of best performer, obtained using recycled and environmental friendly material.

The polyester fleece is unalterable at high temperatures, flexible, durable, non-toxic, insensitive to chemicals, it doesn't rot; hygienic and transpiring.

High insulation capacity with a thermal conductivity λ of 0.039 W/mk and a fire resistance class of B-s2d0, according to european standard EN 13501.

Polyester Fleece
Grey PVC external lining

ACCUMULATION TANK A1 - GLASS WOOL INSULATION AND ALUMINIUM EXTERNAL LINING

The D.H.W. Storage Tanks with insulation A1 represents the most advanced solution in terms of preventing fire risks on thermal power plants or technical rooms.

With glass wool and an external lining completely made in Aluminium material, this insulation combines the high thermal insulations properties with a fire proofing resistance class A1, according to european standard EN 13501.

Grey PVC external lining

Hardfoam Polyurethane

FIRE RESISTANCE CLASSIFICATION ACCORDING TO EUROPEAN STANDARD EN 13501

Fire Reaction			Smoke release			(drops)		
A1	FIRE PROOF		NO TEST REQUIRED			NO TEST REQUIRED		
A2		Fireproof	s1		None	d0		No in the first 10 minutes
B		Limited	s2		Limited	d1		Limited Dripping of incandescent materials in the last 10 seconds
C		Decreasing performance levels from C to E reaction class	s3		High			
D								
E								
F	No performance declared							

MATERIALS

All Cordivari Products are manufactured using high level quality of raw materials and internal finishes:

316L STAINLESS STEEL

316L Stainless Steel

The choice of stainless steel material on calorifiers aims for an absolute quality result. Material with high performances, entirely hygienic and atossic, suitable for

Domestic Hot Water, resistant to low and high temperatures, 100% recyclable. Cordivari is leader in the production of 316L stainless steel (EN 1.4404) calorifiers with high quality standard levels.

POLYWARM®

WATER HYGIENE AND PROTECTION

- **Drinkability and Hygiene at 100%;**
- **Elasticity E>20%;**
- **Capacities up to 6000 lt;**
- **Temperature resistance till 130°C;**
- **Thickness >200 µm for a total protection to corrosion.**

Our customer oriented approach and our long tradition as cylinder manufacturer allow us to offer cutting edge solutions for production and storage of Domestic Hot Water Cylinders.

Polywarm® properties have passed the adherence tests according to BS3900-E6 and DIN 53151, hardness tests according to ASTM D 3363-74 (matite), Impact resistance test (2 Joule) according to BS3900-E6 and at 10 kg x cm (UNI 8901). Polywarm® has excelled in chemical and durability testing (>1000 hours) in salt spray testing according to UNI 5687-73 and Humidity cycle according to UNI 8744.

Drinkability and Hygiene at 100%, elasticity E>20%, capacities up to 6000 litres,

temperature resistance till 130°C. Thickness >200 µm for a total protection to corrosion.

Polywarm® Hygienic Certifications:

- Certificate of conformity for Domestic Hot Water of organic coating for food uses Polywarm® granted by IPL (Institut Pasteur de Lille - France).
- Test report of internal treatment for food use Polywarm® in accordance with D.M. nr. 174 del 06/04/2004 granted by SSICA Laboratory of Parma - Italy.
- Certificate OFI - Vienna, Austria, according to DVGW W270-UBA.
- WRAS - Water Regulation Advisory Scheme certificate

HOT GALVANIZING PROCESS

The galvanizing process protect the steel from corrosion, granting a long life product.

Thank to the high temperatures of the treatment, the galvanizing process helps to get better performances.

Cordivari premises are equipped with a high-tech hot galvanizing system. The tank is dipped in a melted zinc bath (99,99% pure) according to European

standard UNI EN 1179, lead percentage 100 times less than the maximal value permitted by D.M. n.174 dated 06/04/2004. Cordivari galvanizing process does not contain dangerous material, so to be certified for drinkable water use.

HIGH PERFORMANCES ANTI-LEGIONELLA® HEAT EXCHANGER

D.H.W. OPTIMIZED ACCUMULATION

Cordivari Heat Exchanger, with tubes bent to the bottom, are able to heat the complete quantity of water in an homogenous way, also in the lower part of the calorifier. This will ensure total production of the storage of D.H.W. in the calorifier. (10%-15% more than standard heat exchangers). Maximal hygiene will be guaranteed.

STRAIGHT HEAT EXCHANGER: between 10% - 15% of storage volume is not heated with relevant thermal inefficiencies and risk of Legionellosis bacteria diffusion.

BENDED HEAT EXCHANGER: 100% volume will be heated with relevant thermal efficiency and D.H.W. healthiness increase.

"EASY CONTROL" Electronic Display mounted on Cordivari calorifiers allows also to plan periodically sanitary water heating in order to ensure its healthiness.

THERMAL STRATIFICATION

Thermal stratification is a physical process in which an hot fluid naturally tends to position itself higher than the cold one.

The fluid (water) is always moving, and tends to remix, therefore the natural process of stratification must be supported to maintain an increasing temperature gradient from bottom to upper part and avoid the mixing of liquid at different temperatures.

To allow stratification into the tanks means to create a remarkable difference in temperature storing volume from upper to lower part. With important positive effects in terms of efficiency.

A proper stratificated storing means to have quantities of hot water available in short time.

Example of stratification:

Heat received during the day is accumulated in the higher part of the tank, reaching a suitable temperature for end user, while in the lower part temperature remains cold and even when solar collectors have a temperature below the one needed (afternoon-evening), the heat exchanger continues and tanks is storing further energy.

THE TECHNICAL SOLUTIONS FOR THE OPTIMIZATION OF THERMAL STRATIFICATION

“LABYRINTH SPREADER” (CORDIVARI PATENT)

Performances are optimized thanks to the “Labyrinth Spreader” (Cordivari Patent). Its spread shape allows a perfect stratification of the water that returns back from the plate exchange to the tank. Heating installation efficiency is guaranteed.

Sequence of thermographic images that show how Labyrinth Spreader works.

EASY STRATIFICATION BUFFERS (Cordivari Patent)

The heating return stratification system (Cordivari patent), avoid any turbulences, that would affect the thermal stratification inside the buffer tank. Thanks to this optimized solution, efficiency and energy savings are continuously improved.

Sequence of thermographic images that show how a system works with the easy stratification Buffer.

NEW BUFFER TANKS CTS®

The new range of Buffer Tanks CTS® are Cordivari's last innovative storage tanks designed for Solar Thermal Systems.

The exclusive Stratification device CTS® allows to have a prompt delivery of energy suitable for the production of hot water.

The energy absorbed from the Solar Collectors is efficiently stratified in the upper part of the tank through the CTS® stratification device and separation plate already assembled in Buffer CTS®.

The thermal stratification inside the Buffer tanks will be then improved naturally, without any external valves thanks to the mixed combination of:

1. Labyrinth Spreader that allows a perfect stratification of the water that returns back from user thanks to its spread shape avoiding mixes of temperatures of stored water
2. Upper thermal loading systems that concentrates in the upper part of the tank hot water produced by the lower solar fixed coil in short time and high temperature.
3. Lower fixed Heat Exchanger designed for an optimal relation between space and efficiency.

EXAMPLE OF INSTALLATION

INSTALLATION WITH BOLLY® 2 PDC AND SOLAR THERMAL SYSTEM

Cordivari has always placed among its main goals:

The continuous improvement of the products manufactured;

The commitment to use low environmental impact materials that can be almost 100% recycled;

The achievement of the total quality

According to that, Cordivari has worked to obtain the most significant certifications that attest the commitment of the Company on the inside and outwards.

ITALIANS AND EUROPEAN LAWS AND REGULATIONS

Main laws and regulations concerning production and installation of pressurised tanks:

ErP Energy Related Products – Ecodesign Directive 2009/125/CE

UNI EN 12897:2016 - technical details for storage of sanitary hot water and indirect heating systems.

Disposals 2014/68/UE for pressurized equipment

DGLS 15 february 2016, n. 26 - Application of Directive 2014/68/UE Pressure Equipment.

Decrete 1/12/2004 n. 329 - Installation of equipment and pressurized ensemble.

Law January 9th 1991, n. 10 – National energy plan, for energy saving and energy development for renewable energy source

D.P.R. 26-8-1993 n. 412 – applying regulation law 10/91

D.L. 25/01/1992, n.108 – application of disposal n. 89/109/CEE concerning material and object destined to get in touch with food products.

DPR 777 del 23/08/1982 - application of European Directive 76/893

WRAS
Water Regulations Advisory Scheme

**WATER REGULATIONS ADVISORY SCHEME (WRAS)
MATERIAL APPROVAL**

The material referred to in this letter is suitable for contact with wholesome water for domestic purposes having met the requirements of BS 6920-1:2000 "Suitability of non-metallic products for use in contact with water intended for human consumption with regard to their effect on the quality of the water".

The reference relates solely to its effect on the quality of the water with which it may come into contact and does not signify the approval of its mechanical or physical properties for any use.

FACTORY APPLIED PIPE & FITTING COATINGS **5039**

Polywarm. Factory applied, brown coloured enamel coating. Apply as per manufacturer's instructions. Cure for 30 minutes at 240°C. For use with water up to 85°C.

This material is only approved for the curing conditions that appear on the approval. If the cure conditions are varied from those specified on the approval then the material is not covered by the scope of the approval.

APPROVAL NUMBER: 130537
APPROVAL HOLDER: CORDIVARI SRL

The Scheme reserves the right to review approval. This approval is valid between February 2013 and February 2018.

An entry, as above, will accordingly be included in the Water Fittings Directory on-line under the section headed, "Materials which have passed full tests of effect on water quality".

The Directory may be found at: www.wrass.co.uk/directory

Yours faithfully

PRÜFZEUGNIS
Prüfung gemäß des DVGW Arbeitsblattes W 270 (Ausgabe 11/2007)

Prüfinstitut: off Technologie & Innovation GmbH
Brennstoffstraße 14 A
1150 Wien

Prüfdatum: 06/2012 bis 09/2012

Prüfnummer: 407.873/2

Firma/Markenname: CORDIVARI S.r.l.

Werkstoff/Produkt: Beschichtung „POLYWARM“

Einsatzbereich: Beschichtung von Produkten im Trinkwasser-Einsatz

Beurteilung:
Die Beschichtung mit der Bezeichnung „POLYWARM“, ist aufgrund der Ergebnisse der vorgenommenen Prüfung (off Prüfbericht Nr. 407.873/2 vom 2012-09-14) unter der Voraussetzung, einer den Vorgaben des Herstellers entsprechenden Verarbeitung in mikrobiologischer Hinsicht uneingeschränkt für den Einsatz im Trinkwasserkontakt geeignet.
Die Gültigkeit des Prüfzeugnisses beginnt mit dem Ausstellungsdatum und endet am 2017-09-14. Es kann bei unveränderten Voraussetzungen um 5 Jahre verlängert werden.

Wien, 2012-09-14

Mag. Elisabeth Novak
Mag. Elisabeth Novak
Technische Leiterin

Das Prüfzeugnis ist nur solange gültig, wie keine Veränderungen in der Zusammensetzung der Beschichtung erfolgen.

Das Prüfzeugnis darf ohne schriftliche Zustimmung der off Technologie & Innovation GmbH nur ungetriggert und ohne Zuhilfenahme von Dritten veröffentlicht werden.

Certificate of Conformity for Polywarm® according to DVGW W270.

CORDIVARI S.r.l.
Zona Industriale Pegliare
64020 MORRO D'ORO (TE)
Italia

PRÜFZEUGNIS
gemäß „Leitlinie zur hygienischen Beurteilung von organischen Beschichtungen in Kontakt mit Trinkwasser“ des Umweltbundesamtes (Stand 2008)

Hersteller: CORDIVARI S.r.l.

Proben: Beschichtung mit der Bezeichnung „POLYWARM“

Prüfung: Produktprüfung (beschichtete Metalplatten)

Die geprüfte Beschichtung erfüllt gemäß off Prüfbericht 407.873/1 vom 2012-12-12 die Anforderungen der Beschichtungsleitlinie für folgende Einsatz- und Temperaturbereiche:

Einsatzbereiche - Kategorien	Kaltwasser (12°C)	Warmwasser (60°C)	Heißwasser (85°C)
Rohre > DN 80 (Hausinstallation)	—	—	—
Rohre > DN 80 < DN 300 (Verleitung)	—	—	—
Rohre > DN 300 (Hauptleitung)	—	—	—
Behälter (Hausinstallation)	erfüllt	—	—
Behälter (außerhalb Hausinstallation)	erfüllt	—	—
Ausrüstungsgegenstände (Hausinstallation)	erfüllt	—	—
Ausrüstungsgegenstände (Verleitung)	erfüllt	—	—
Ausrüstungsgegenstände (Hauptleitung)	erfüllt	—	—

Die Gültigkeit des Prüfzeugnisses richtet sich nach anderenorts festgelegten Regeln, sie beginnt mit dem Ausstellungsdatum und endet bei unveränderten Voraussetzungen spätestens am 2017-12-18.

Wien, 2012-12-18

Mag. Elisabeth Novak
Mag. Elisabeth Novak
Technische Leiterin

Das Prüfzeugnis ist nur solange gültig, als keine Veränderung in der Zusammensetzung des Materials sowie der Verarbeitungstechnik erfolgen.

Das Prüfzeugnis darf ohne schriftliche Zustimmung der off Technologie & Innovation GmbH nur ungetriggert und ohne Zuhilfenahme von Dritten veröffentlicht werden.

Certificate of Conformity Polywarm according to UBA KTW.

REGULATIONS FOR A CORRECT INSTALLATIONS OF PRESSURE TANKS

OVERPRESSURE PROTECTION:

If the sanitary water installation exceeds the admissible values of pressure of the calorifier, a pressure regulator as far away as possible from the calorifier has to be installed.

- Calorifier with primary circuits fluid with temperature below 110°C

To avoid damages on products due to sudden changes of pressure, it is always necessary to provide an expansion system, according to "Raccolta R ed. 2009 chapt. (R-1a)". For Water Heater with primary circuit temperature above to boiling secondary fluid at 0.5 bar pressure must have safety devices (thermostat, pressurestat, level/min. pressure protection). This expansion system can simply consist in a safety valve, counterweight, or spring-loaded, which port has to be a diameter in millimetres not lower than:

$$D_{\min} = \sqrt{(V/5)}$$

where V is Volume of Calorifier in liters, minimum diameter 15mm. The valve must be calibrated at a pressure not exceeding the maximum working pressure of the calorifier and connected without any shut off device.

Besides the safety valve is however recommended to install a closed expansion vessel with atoxic membrane, in order to avoid a continuous opening of valve.

Cordivari Heat exchangers are manufactured in accordance with 97/23 CE directive and in reference to art. n. 3.3 of this directive they do not have to be marked CE

- Calorifiers with primary circuit supplied by fluid with temperature exceeding 110°C (steam or hot water)

For Water Heater with primary circuit temperature above to boiling secondary fluid at 0.5 bar pressure must have safety devices (thermostat, pressurestat, level/min. pressure protection).

Referring to primary circuit on Heat exchangers the provision on pressure working equipment shall be applied.

For provisions on systems with heat exchangers supplied by fluid with temperature exceeding 110°C with open and closed expansion vessel (such as control and safety device)

Please refer to chapt. "R.3.D. Racc. R ed. 2009".

- Calorifiers for solar thermal systems

Please refer to chapt. "R.3.D. Racc. R ed. 2009 and for calorifiers that not have to be marked CE:

- Primary Circuit Temperature never exceeds 140°C (that can be reached only for limited periods of time).

- Maximum working pressure meets following restrictions: the result Pressure x Volume of exchanger must not exceed 50bar/litre:

$$P \times V \leq 50 \text{ [bar} \times \text{liter]}$$

given the volume of fluid in the heat exchanger, is then possible to calculate with the above formula, the maximum permissible operating pressure for each heat exchanger

- surface of collectors does not exceed 50m² and the potentiality is lower than the total usable at 35Kw

Above these limits, the exchanger (as well as the installation) is subject to requirements so as stated in provisions for in pressure working equipments (design, and plant testing also when in operation, periodic restructuring) it is therefore necessary to use designed and tested exchangers according to 2014/68/UE Pressure Equipment.

CORROSION PROTECTION

To avoid electro-chemical corrosion - and in order to comply with the warranty's conditions too - the cylinder has to be installed always with its cathode protection. Cordivari Srl gives according to the tank version:

- Anoden-tester magnesium bar, which allows to check the real consumption of the magnesium bar just pushing on the "tester button".
- Simpletest Anode (easy checking acting on the relative valve - any water outlet indicates the immediate substitution of the anode)
- Standard anode, where it is necessary the visual checking of the magnesium bar.

As accessory (only for Polywarm® version) also available the electronic anode which do not need to be replaced and need only an uninterrupted electricity. It is also necessary, for warranty purposes too, that the water never exceeds the values indicated on DPR 236/88. To avoid any galvanic currents tank grounding have to be done.

LEGIONELLOSIS PROTECTION

Legionellosis can widespread with temperatures between 30°C and 45°C. To avoid any risk water tank has to be accumulated at 60°C and never reach temperature lower than 50°C.

CALORIFIERS & BUFFERTANKS

Must always installed to protect from atmospheric agents on a base of proper solidity, checking before you make the connections that there is sufficient space for extracting the heat exchanger, magnesium anode, eventual resistance and other technical components specific to the various products and for an easy opening of any inspection flange.

Make sure that the premises, or technical rooms intended to contain the tanks are provided with sufficient openings to facilitate the passage of the tanks by considering overall dimensions and avoiding therefore any necessity for demolitions both when installing and removing the tanks

For all cylinders with plate heat exchangers the hardness of the sanitary water inlet must be less than 30 ° f (French degrees).

It is necessary to install the storage tank / buffer tank providing appropriate and adequate drainage for any water leaks.

CHILLED WATER AND INERTIAL TANKS

Make sure that the premises, or technical rooms intended to contain the tanks are provided with sufficient openings to facilitate the passage of the tanks by considering overall dimensions and avoiding therefore any necessity for demolitions both when installing and removing the tanks

GENERAL SALES CONDITIONS AND WARRANTY

Sales of Cordivari's products are made according to the conditions listed below. Exception should be agreed in written with Cordivari Srl.

1. Shipment

Goods are shipped at buyer's (purchaser) risk and peril, even if transport is organized by Cordivari. Goods have to be checked at the delivery about unaltered packaging, missing or confused items in the presence of the forwarder. Any claim has to be immediately communicated to the forwarder by appointing the shipment's document and by registered mail within 8 days (otherwise the forwarder is cleared of his responsibilities).

2. Delivery terms

Delivery terms are indicative. Failure to comply with the agreed delivery terms for any reasons will not entitle the buyer (purchaser) to any compensation, cancellation or modification of the order without our prior consent. In case of exceptional events like weather disaster, strikes or market shortage of raw materials not predictable, Cordivari will decide the best decision to take. If the ordered goods will not be collected in the time agreed, this material will be invoiced and stored at buyer's costs and risks.

3. Weight, measures, surfaces

Weights, measures, surfaces, shapes, sizes and other figures related to the products are merely indicative and Cordivari Srl may at any time modify them without any notice.

4. Order cancellation or modification

No orders shall be cancelled or modified even partially without the consent of Cordivari Srl. It will not be possible to modify the order when the production has already started. Potential costs due to the modifications or cancellation will be charged to the buyer (purchaser).

5. Warranty

On all Stainless Steel 316L cylinders the warranty granted by Cordivari Srl is 5 years

On all Polywarm® coating cylinders the warranty granted by Cordivari Srl is 5 years

On all galvanized cylinders the warranty granted by Cordivari Srl is 2 years

For all extractable and plate heat exchanger (plate-to-plate and brazed) either mounted on calorifiers or separately sold, Cordivari grants 2 years warranty.

For all Buffertanks Cordivari grants 2 years warranty

For buffertanks COMBI and ECO-COMBI, Cordivari grants 2 years warranty on heating water storage tanks and 5 years on Domestic Hot Water Parts.

Accessories and other items within the catalogue and not listed in currents Sales and Warranty Conditions (like the heat pump), warranty granted by Cordivari Srl is 2 years with the exclusion of technical, electrical, electronic components for which the granted warranty is 12 months.

For special customized or other products for special projects the granted warranty by Cordivari srl is 2 years.

The warranty is valid for product defects, if all points of current article 5 are respected, and valid only if the products is set with the cathode protection in an efficient and permanent way. This last one has to be frequently checked. The installation should respect the parameters in force about overpressure, corrosion, legionellos according to the prescriptions previously listed in this catalogue (See "Regulation for a correct installation of pressure tanks" section of current Catalogue). Basically the sanitary water productions units have to comply with the national directive about water treatment.

The warranty is no more valid in case of non observance of local regulations.

Warranty will be applicable at the following conditions:

- Products must have been stored in good conditions and protected for the inclemency of the weather before installation
- Products did not have damages during transport, handling or installation.
- No alterations or reparations must be done without the prior consent of the seller
- The installation must have been done by authorized professionals and in conformity with all instructions and standards written on the technical data sheets provided by Cordivari Srl, and according to eventual specific technical rules and general disposition
- Accessories used must be original provided Cordivari materials
- The buyer must have paid all the bills within the pre-established deadlines
- No aggressive chemical substances must have been added to the water.
- Working pressure and temperature shown in the catalogue must correspond to the current usage pressure and temperature.

Those parts subject to natural consumption (as magnesium anode, gaskets, bolts) are always excluded for any warranty.

Warranty starts from Cordivari's commercial invoice date and will be not renewed in case of product replacement

The warranty doesn't cover construction or dismantling cost to move the product from/to the installation place.

Cordivari srl is committed during the warranty period to refund the returned product if confirmed as to be defective.

Besides, the purchaser may not claim any other costs of direct or indirect damage, to person / or properties resulting from above confirmed defects.

The materials that have to be replaced or repaired must be shipped free of carriage to the Cordivari plant.

Systems and products present on this catalogue are designed and realized according to European standards CE-EN-UNI-e PED. Systems and products follow these warranty and conformity conditions only for countries where those laws are applicable. Cordivari has no responsibilities about warranty and conformity for extra UE countries or where these laws are not applicable.

6. Payments

All invoices have to be paid according to the agreed deadline. Any delay, even partially may suspend immediately the planned deliveries. Overdue interest could be charged at current rates.

7. Goods' property

Cordivari Srl remains owner of the delivered goods until they are not completely paid by the buyer (purchaser). In case of failure to proceed with the payment by the buyer (purchaser), Cordivari Srl can ask for the immediate return of the delivered goods, keeping the partial paid amount as indemnity, or even ask for a bigger amount should the damage be higher.

8. Prices

Prices are not binding and can be modified without notice at anytime. Prices are revisable, in case of market conditions changes Cordivari srl reserve the right to modify them for goods still to be delivered. Stated prices are ex-works Cordivari Plant in Morro D'oro (TE - Italy), except in case of written agreements. For some voluminous delivery Cordivari may charge some packing extra-costs.

Prices on this Pricelist are V.A.T. excluded

9. Orders

The minimum order is Euro 2.000,00. Given orders are binding to the buyer, who acknowledges of all our sales conditions.

In case the client draws up the order in name and on behalf of others, with the signing of the order he is committed to the fulfillment of what agreed.

Delivery is only at the headquarters / warehouse of the Customer, for different deliveries please contact our sales office.

Additional costs may be asked to the buyer (purchaser) in case of special requests on delivery term (express delivery, etc.)

10. Court authority

For the following Catalogue and conditions only the provisions of Italian law will be used. For controversy, the Court of Teramo (Italy) shall have exclusive competence. Essential and trial law shall be exclusively Italian.

11. Notes

Translation of Cordivari General sales conditions and warranty terms, reported in this page, has been done from the Italian version. In case of possible controversy, the official Cordivari General sales condition and warranty terms are the one reported in the Italian language, stated at the following page of this catalogue.

CONDIZIONI GENERALI DI VENDITA E GARANZIA

Le vendite dei prodotti della Cordivari Srl sono effettuate conformemente alle sotto elencate Condizioni Generali di Vendita e Garanzia. Ogni deroga a queste condizioni è subordinata all'accettazione scritta da parte della Cordivari Srl.

1. Spedizione

La merce viaggia a rischio e pericolo del Committente, anche se viene spedita franco destino. La merce deve essere verificata all'atto della consegna, controllando l'integrità dell'imballo, articoli mancanti o sostituzioni in presenza del trasportatore. Ogni contestazione dovrà essere segnalata immediatamente al trasportatore/corriere firmando con riserva il DDT e confermando tale riserva a mezzo lettera raccomandata o posta certificata entro otto giorni dal ricevimento merce.

2. Termini di Consegna

I termini di consegna si intendono puramente indicativi e comunque se il termine di consegna non potesse essere rispettato per qualsiasi motivo, il Committente non avrà diritto a esigere alcun indennizzo, pagamenti di penali, annullamento o modifica all'ordine conferitoci. In caso di eventi straordinari quali calamità naturali, scioperi, mancanza di materie prime e cause di forza maggiore, la Cordivari Srl si riserva la scelta delle misure da adottare. Se la merce ordinata non viene ritirata nel periodo concordato, questa verrà fatturata e immagazzinata con costi, rischio e pericolo a carico del Committente.

3. Pesì, misure, superfici

Pesi, misure, superfici, forme, dimensioni, immagini e altri dati sono indicativi e non impegnativi e possono subire delle modifiche o variazioni che la Cordivari Srl si riserva di apportare ai suoi prodotti senza preavviso.

4. Annullamento o modifica ordine

Senza il consenso scritto della Cordivari Srl, le ordinazioni conferite non possono essere né parzialmente né totalmente annullate o modificate. Non si accordano variazioni o modifiche quando è già stata intrapresa la lavorazione. Eventuali spese derivanti dall'annullamento o modifica dell'ordine saranno fatturate al Committente.

5. Garanzia

Per tutti i bollitori in acciaio inox 316 L la Cordivari Srl garantisce anni 5.

Per tutti i bollitori con trattamento anticorrosivo interno in Polywarm® la Cordivari Srl garantisce anni 5.

Per tutti i recipienti con trattamento anticorrosivo di zincatura a caldo la Cordivari Srl garantisce anni 2.

Per tutti gli scambiatori di calore estraibili e a piastre (ispezionabili e saldobrasati), sia montati sui bollitori sia venduti singolarmente la Cordivari Srl garantisce anni 2.

Per tutti i termoaccumulatori PUFFER e TERMOACCUMULATORI COMBINATI la Cordivari Srl garantisce anni 5.

Per gli accessori e per gli articoli residuali del presente catalogo non contemplati nelle condizioni generali di vendita la Cordivari Srl garantisce anni 2 ad eccezione di componenti tecnici, elettrici ed elettronici, dove la garanzia è di 12 mesi.

Per tutti gli articoli fuori standard, i prodotti speciali realizzati su specifica del Cliente, la Cordivari Srl garantisce anni 2.

I prodotti ed i sistemi presenti in questo catalogo sono progettati e realizzati in conformità alle direttive di riferimento CE-EN-UNI-e PED. La garanzia e la conformità di detti prodotti e sistemi hanno valenza esclusivamente in quei paesi dove tali norme sono riconosciute e recepite. In paesi extra-europei o comunque in paesi che non recepiscono tali norme la Cordivari non assume responsabilità per garanzia e conformità.

La garanzia copre i difetti di fabbricazione. Essa decade se non vengono rispettati i punti dell'art.5. Sussiste a condizione che l'installazione dei prodotti abbia rispettato i criteri della protezione dalla sovrappressione, corrosione, legionella e norme e prescrizioni di installazione e utilizzo descritte nel presente catalogo e tutte le eventuali norme in materia impiantistica. Negli impianti di produzione di acqua calda sanitaria, così come in quelli di riscaldamento, attenersi, ai fini della garanzia, a quanto disposto dalla norma UNI CTI 8065 che prevede vari tipi di trattamenti dell'acqua in funzione delle sue caratteristiche. La garanzia non copre danni derivanti da inadempienze alle prescrizioni della norma UNI CTI 8065.

L'impegno di prestare la garanzia sussiste a condizione che:

Il prodotto sia stato immagazzinato in buone condizioni e al riparo dalle intemperie prima dell'installazione;

Il prodotto non abbia subito danneggiamenti durante il trasporto, le movimentazioni o l'installazione;

Non siano state compiute manomissioni o riparazioni da persone non autorizzate dalla Cordivari Srl;

L'installazione sia stata realizzata da personale autorizzato, in conformità alle istruzioni e alle norme indicate sulla documentazione tecnica fornita dalla Cordivari Srl e alle norme e prescrizioni di installazione e utilizzo riportate nel presente catalogo e che siano state rispettate eventuali disposizioni di leggi o norme tecniche specifiche;

Gli accessori utilizzati siano quelli regolarmente forniti dalla Cordivari Srl;

Il compratore abbia effettuato il saldo dei pagamenti nei termini prestabiliti;

Non siano state eseguite aggiunte di sostanze chimiche aggressive all'acqua;

La pressione e la temperatura di esercizio indicate sul catalogo corrispondano alla pressione e alla temperatura limite di utilizzo.

Sono esclusi sempre da qualsiasi garanzia quei particolari soggetti a naturale usura (es. anodi, guarnizioni, bulloni ecc.).

La garanzia decorre dalla data della fattura di vendita della Cordivari Srl e non si rinnova in alcun caso nell'eventualità di una sostituzione del prodotto.

La garanzia non copre costi dovuti a demolizioni, lavori per il passaggio dei prodotti sia in ingresso che in uscita e la manodopera per eventuali sostituzioni di prodotto.

Cordivari Srl si impegna durante il periodo di garanzia alla sostituzione del prodotto reso riconosciuto difettoso per accertati difetti di produzione, oltre a ciò il Committente non potrà vantare alcun altro risarcimento per spese di danno, diretti o indiretti di qualsiasi natura a persone e/o a cose derivanti da detti difetti.

6. Pagamenti

I pagamenti delle fatture relative alle forniture dovranno essere effettuati entro i termini di scadenza stabiliti. Il ritardo nel pagamento delle fatture, anche se parziale, dà luogo alla decorrenza degli interessi di mora nella misura del tasso corrente, oltre alla sospensione immediata delle spedizioni in corso e del processamento di eventuali ordini.

7. Riserva di proprietà

I prodotti restano di proprietà della Cordivari Srl fino al pagamento dell'ultima rata di Price di merce consegnata. In caso di inadempimento anche parziale del compratore la Cordivari Srl potrà chiedere l'immediata restituzione della merce trattenendo comunque le rate pagate a titolo di indennità salvo il maggior danno.

8. Prezzi

I prezzi non sono impegnativi e possono essere modificati senza preavviso. I prezzi sono revisionabili in funzione delle variazioni che dovessero intervenire fino al momento della consegna. I prezzi si intendono resa franco stabilimento di Morro D'Oro (TE), salvo diversi accordi.

I prezzi sono sempre riportati nel listino al netto di IVA.

For models ingombranti la Cordivari Srl si riserva di chiedere una partecipazione alle spese di imballaggio e trasporto.

9. Ordini/Consegna

Il valore minimo per ordine è di Euro 1.000; per ordini inferiori alla somma di Euro 1.000, contributo del 6% con addebito minimo di Euro 25,00. Gli ordini impartiti impegnano definitivamente il Committente che deve dichiarare di conoscere e accettare tutte le condizioni di vendita. Nel caso in cui il Committente rediga l'ordine per nome e per conto e in nome di altri, con la firma dell'ordine si impegna in solido all'adempimento di quanto da egli convenuto. La consegna si intende esclusivamente presso la sede/magazzino del Committente.

Richieste particolari del Committente come: consegne espresso, consegna diversa dalla sede/magazzino, etc. avranno costi addizionali che verranno comunicati di volta in volta dal nostro ufficio commerciale.

10. Foro competente

Foro Competente. Per qualsiasi controversia derivante dal presente contratto o collegata allo stesso è competente il Foro di Teramo.
